UNITY
THE IDEA

The idea was to combine perfect light with acoustics.
The result: UNITY, a combination of SLIDER modules and acoustic materials.

UNITY

THE SPECIAL

What is so special about UNITY? UNITY is a versatile, flexible system with Y, X, T, L and straight modules from 800mm - 2800mm (31 ½" - 110 ¼") The modules create intersections and merge seamlessly into one another. We are the only ones on the market who sell an acoustic luminaire as a system.

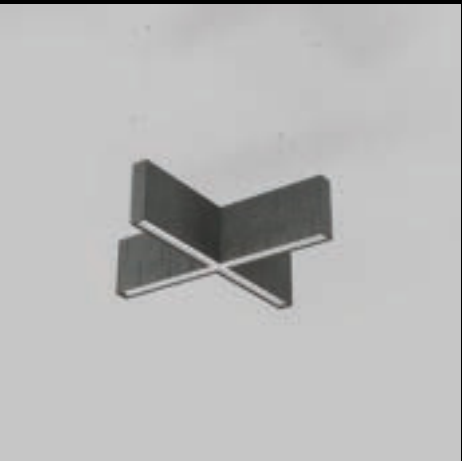

UNITY COLORS

Each module can be configured in 32 selectable colours, giving your system even more individuality

2700K, 3000K, 3500K, 4000K, TW

UNITY

LIGHTING TECHNOLOGY

OPAL: Distributes the light evenly and ensures homogeneous lighting.

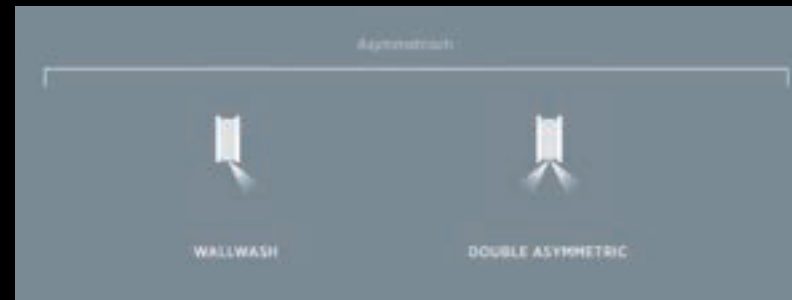

MICROPRISM: Effective glare limitation with high ceilings.

GLARE CONTROL: Provides plenty of light without glare.

RASTER: Concentrates the light for optimum comfort, perfect for demanding rooms such as offices.

WALL WASH: Provides a seamless, even beam of light in a horizontal direction.

DOUBLE ASYMMETRIC: casts the light in two directions, creating an attractive play of shadows.

UNITY

USP

- Unique on the acoustic market 1
 - Individual luminaires from 80mm - 2800mm
(31 ½" - 110 ¼")
 - X-Y-T-L modules
 - Can be combined together for an acoustic luminaire system
- Unique on the acoustic market 2
 - No other acoustic luminaire has so many technical lighting options
 - From opal, micro-prism, raster to wallwasher and double-asymmetric
- Attractive design thanks to V-cuts in the acoustic material
- 32 acoustic colours to choose from
