

ClickTrack is a linear profile system built on the concept of continuous and flexible runs, in a minimalistic and contemporary fitting.

The light inserts are installed simply by clicking them into the track, without the need for tools. There are different inserts for diffused and targeted light with a range of lenses and lumen packages. The great flexibility of the ClickTrack extension system promises a perfect performance of lighting concepts.

Trimless

> 1" opening | 2" opening

Surface

1" x 2 1/2"

Suspension

1" x 2 1/2"
