

Hilow is a statement piece, balancing architectural with design, and form with function.

The light is made of a combination of linear elements that create a grid-like shape for both suspension and surface; with wall and ceiling applications. The design is inclusive of downlight linears, and uplight linears for a controlled and complete light distribution. Color finishes available include white, satin black, bronze, matte brass and titanium, along with the choice of a white opal or black diffuser.

Surface

44" x 32"

Suspension

44" x 32"

(all sizes are using approximate measurements)

Colors

- white
- satin black
- bronze
- matte brass
- titanium

Notes

The black diffuser will adjust the delivered lumen output, a preferred choice for a softer distribution and unique design.

Features

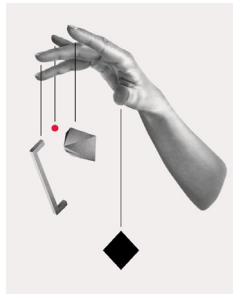

- Double emission
- IP20 for interior use only
- Suspended version can be installed with majority of light downwards or upwards.
