# Nodo

Architectural

As a customization, track and modules can be treated with different finishing techniques: special anodizing, varnishing, veneer, sublimation and application of 3M™ DI-NOC™ Architectural Finishes.

NODO

NODO is an innovative track system that adds flexibility, eliminates constraints, multiplies possibilities and cuts costs. NODO system is equipped with track lights, electrical receptacles, USB connections, and non-electrified accessories, which can all be repositioned wherever and whenever you want. The backlit 3-circuit track is customizable in length and can be run to any area of the room with the use of 90° joints and Smart-ON quick connectors, freeing your lighting design from any electrical constraints.
