

Magiq Pro is a modular linear spot light. Select your options for each light cell, making the complete system unique to an application.

The series has four frame options, single, double, triple and quadruple, and three light types, Pro Standard, Pro Wallwash, Pro Sport. Alongside the benefit of each light cell customization, the fixture maintains its pristine features of low unified glare control rating, Prolicht's Bartenbach LFO lenses and 29 color finish options.

### Trimless & Recessed

One frame: 2" x 2" (approx)
