

Create an indirect wall effect with a flexible and delicate linear light form, in one, two, three or four strip options.

Formala is made from stainless steel and offers two driver options, integral or remote. It's merely a ribbon of light that can be positioned in an infinite array of configurations: straight or curved lines, symmetric and asymmetric, open or closed. For stability, the small magnetic components hold down the LED strip to the aluminum.

Surface

46" | 50" | 90" | 94" | 133" | 178"

Colors

- white with stainless steel
- black with stainless steel

Notes

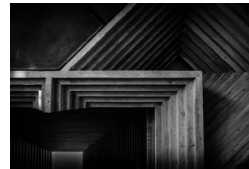

Easy installation, custom lengths, patent protected

Features

- Onsite flexible luminaire
- Magnetic ends
- 2 sizes with integral drivers
- 4 sizes with remote drivers
- Diffuser available for softening the light
