YOUR PERFECT FOCUSING

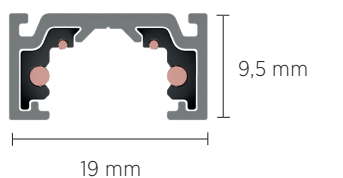

For the perfect definition of your light setting, not only each spot can be tilted from 0° to 90° and rotated 355°, but comes also equipped with a tool-less locking system, to fix in position the desired rotation, also when spots are installed in vertical track.

MINIMAL ESSENCE

Minimalistic design, minimal installation effort, tailor-made result in the most simple way.

DALI CONTROL PROFIL

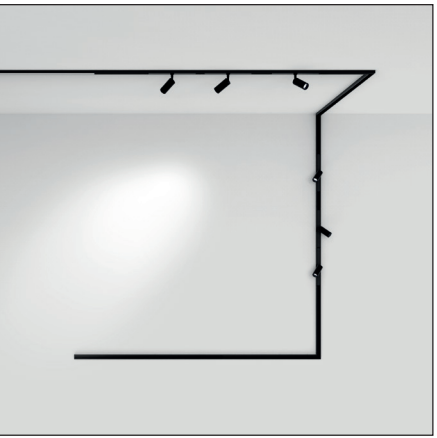

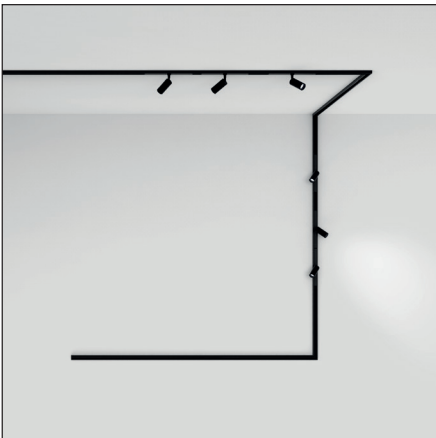

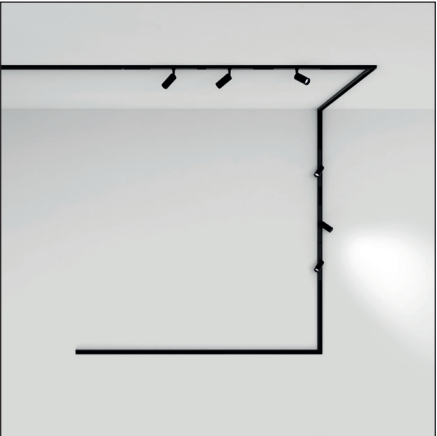

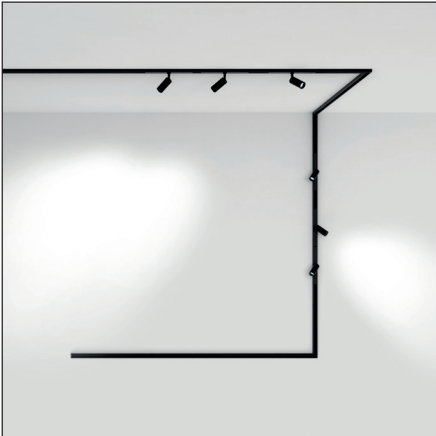

DALI offers individual control of each single luminaire, with the possibility of managing groups and scenarios.

The PUSH DIMM solution offers simple control of all the fittings in the same track and can be easily operated with a pushbutton.

DALI DIM

Every moment, every day and every situation is different. The IMAGINE MICRO spots for the MINIMAL TRACK can be dimmed individually, in groups or together with DALI. This enables complete control of your lighting atmosphere. The PUSH DIMM solution offers simple control of all the fittings in the same track and can be easily operated with a pushbutton.

MINIMALTRACK

EASY INTEGRATION

CONCRETE CEILING

You can choose an integrated feed connector for the most discrete installation with a remote driver or a compact surface mounted box, which is ideal for concrete ceilings and refurbishment applications, minimizing the impact on existing electrical wiring.

EASY TO CUT ON SITE

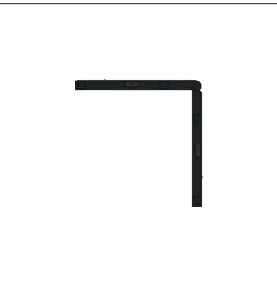

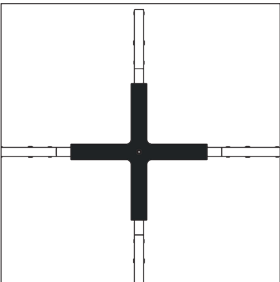

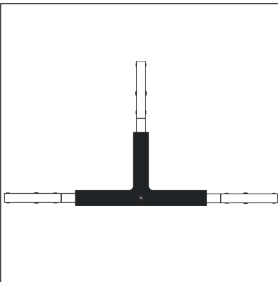

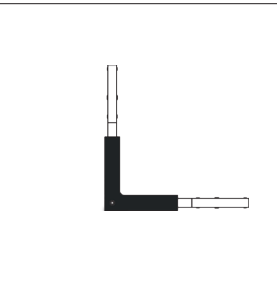

The track is conceived to be easily cut on site, and directly screwed to the ceiling for a tailor-made result in each installation.

CAN BE SCREWED DIRECTLY TO THE CEILING

The surface-mounted system is particularly easy to install on any wall or ceiling, while its ultra-slim design gives it the appearance of an embedded system.

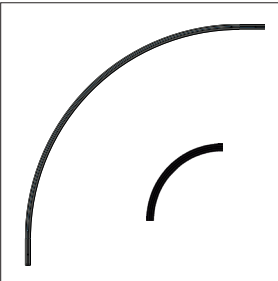

The MINIMAL TRACK allows you to simply design any line you want – available with 90° integrated connectors for elbows on the same surface or to jump ceiling to wall or T and X connectors with two different aesthetics to match various tastes in interior design. The track can be easily cut on site to perfectly fulfil any project requirements.
