Components

Direct Wall/Ceiling Support
The use of a support every 81cm / 2' - 7" of the track allows for a maximum load of 10 Kg per meter.
Place the support in correspondence with the end parts of the installation and near the joints.

Ceiling Support with Suspension Cable
The use of a support every 100cm / 3' - 3 3/8" of the track allows for a maximum load of 10 Kg per meter.
Use the ceiling fasteners by placing them near the terminal parts of the installation and near the joints.
Plate with holes for track balance

Linear Coupling
Conductor vs Insulator
The Conductive Joint allows the mechanical connection and the electrical connection between two tracks.
The Insulating Joint allows the mechanical connection between two tracks allowing electrical separation in several sectors, each of which must be in turn powered.

Locking Device
Prevents movement of Nodo Box, Nuo, Neutra, and Bob from possible removal from system.
