ARCHITECTURAL

New Products 2024

Centriq - Recessed

- By introducing the recessed version, Centriq expands its mounting options, providing users with even more flexibility to create a consistent luminaire concept.
- Centriq's recessed version incorporates the Exact Positioning System (EPS), ensuring precise angling of the spotlights. With the ability to rotate 350° and tilt 70°, users can achieve optimal positioning for their lighting needs.
- The embossed degree settings and audible clicks at every 10° make adjusting the angles intuitive and accurate.
- Available in 29 standard colors, Centriq offers a bespoke solution for every design, enabling users to tailor the lighting to their specific aesthetic preferences and spatial requirements.

Centriq

Centriq Round Adjustable

- The round recessed design ensures a clean and unobstructed ceiling appearance, enhancing the aesthetics of interior spaces without compromising on functionality.
- Offers flexibility in light orientation, allowing you to direct light precisely where needed for optimal illumination and design versatility.
- The Flex version allows for easy manual adjustment of the beam angle from a narrow 12-degree to a wide 45-degree, providing adaptability for various lighting needs and precise light direction.
- Ideal for settings where light direction precision is crucial, ensuring that the lighting can be tailored to highlight specific areas or create desired atmospheres effectively.

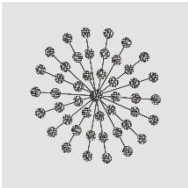

Centriq

Code

- Stripped of diffusers, lenses, and secondary optics, each board reveals the circuit and flow of power, creating a visually striking and technically transparent lighting solution.
- Includes the subseries Totem Dot, Beacon Dot, Beacon Grid, Screen Dot, Screen Grid, and Explosion Dot, each offering unique design elements and lighting capabilities for tailored lighting solutions.
- Designed for portable and surface wall/ceiling installations, Code supports various sculptural forms and configurations, making it adaptable to a wide range of architectural and design needs.

Code

Code System

- Groundbreaking fusion of technical lighting engineering and the unmistakable Tom Dixon design aesthetic, creating a unique and visionary product.
- Seamlessly integrates onto ceilings or walls, with custom lengths and inserts available to tailor the system to any space, ensuring a perfect fit for every project.
- The natural evolution of the Minimal Track, featuring the smallest track possible while enabling individual control of each luminaire and endless configuration options.

Code System

Glorious Acoustic

- The Glorious collection now features acoustic panels integrated into its luminaires, transforming the previously hollow interior into a functional design element. This innovation enhances both visual appeal and sound quality in any space.
- Designed with both aesthetics and acoustics in mind, the enhanced Glorious collection combines lighting functionality with sound absorption capabilities, creating a versatile solution for modern interiors.
- Building on the popularity of the original Glorious collection, these enhancements maintain the collection's reputation for design excellence while introducing practical benefits for acoustic comfort.

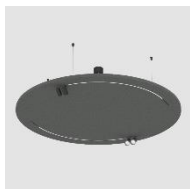

Glorious
Acoustic

Glorious Acoustic Light Panel

- Glorious Acoustic Light Panel offers indirect lighting, creating a seamless appearance on ceilings. They contribute to a clean and modern aesthetic while providing effective illumination without visible light sources.
- Designed to complement the Glorious luminaires, these panels improve room acoustics by reducing echoes and enhancing sound absorption. They contribute to a more comfortable and productive environment.
- The circular shape of the Light Panels opens up new possibilities for lighting design, allowing for creative arrangements and configurations. They are suitable for a wide range of settings, enhancing both functionality and visual appeal.
- Available in 32 vibrant colors, the Light Panels offer flexibility to match various interior themes and design preferences.

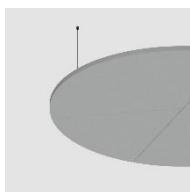

Glorious
Acoustic
Light Panel

Glorious Acoustic Panel

- Designed to perfectly complement our Glorious, Glorious Acoustic, Glorious Slim Acoustic, and Glorious Acoustic Light Panel luminaires for a cohesive acoustic solution.
- Improves room acoustics, making it an ideal choice for a variety of settings such as offices, conference rooms, and residential spaces.
- Available in a palette of 32 stunning colors for both the panels and the holders, allowing for endless possibilities in personalized and creative acoustic solutions.

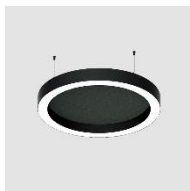

Glorious
Acoustic
Panel

Glorious Slim Acoustic

- The Glorious Slim collection now features integrated acoustic panels, transforming its previously hollow interior into a functional design element. This enhancement improves sound quality by reducing echoes and enhancing acoustic comfort in any environment.
- The addition of acoustic materials not only improves sound performance but also enhances the visual appeal of the luminaires. It adds a sophisticated touch to modern interiors while maintaining the sleek and minimalist design of the Glorious Slim collection.
- Designed with sustainability in mind, the integration of acoustic materials into the Glorious Slim luminaires enhances their functionality without compromising on environmental responsibility, making them a conscientious choice for eco-friendly projects.

Glorious Slim
Acoustic

Imagine Micro

- Designed for diverse projects, the Imagine Micro series blends effortlessly into any room design.
- Offers a wide range of luminaire body colors, allowing for personalized and adaptable lighting solutions.
- Suitable for both plasterboard and concrete ceilings with two different ceiling openings, enhancing adaptability.
- Combines technical sophistication with a minimalist design, making it perfect for any architectural setting.

Imagine Micro

Imagine Micro Flex

- Delivers exceptional brightness, making it ideal for illuminating various objects in shops, galleries, and museums.
- Adjustable beam angle from 14° to 48°, allowing for precise lighting control to meet diverse needs.
- Equipped with a COB module featuring a standard CRI of 90, ensuring accurate and vibrant color representation.
- Integrated plano-convex lens with an ingenious adjustment system ensures flawless focusing and seamless beam transitions.

Imagine Micro
Flex

Invader Micro-Dot

- Elevating the exceptional features of the Invader series, the Invader Micro-Dot introduces the efficiency of its Micro Dot optic.
- Featuring a specialized LFO lens, it guarantees optimal visual comfort while maintaining a low Unified Glare Rating (UGR).
- Choose between two beam angles: medium and very wide flood, offering versatility for targeted or broad-area lighting solutions.
- With advanced optic technology, precise light distribution ensures rooms are illuminated flawlessly.

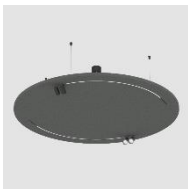

Invader
Micro-Dot

Just Black Acoustic

- Combines the sleek Just Black track with sustainable acoustic panels, offering superior lighting and exceptional sound absorption in one elegant solution.
- Available in three distinct shapes—round, rectangular, and square—the panels can be tailored with Just Black Imagine for precise light direction or Just Black Flexline for soft, ambient lighting. Customize the track inserts and acoustic material colors to complement your aesthetic and functional needs.
- Each panel is crafted from recycled plastic bottles, ensuring high performance and sustainability. With 32 available acoustic colors, you can match any room's decor and personal style while contributing to environmental conservation.
- Just Black Acoustic integrates a track within an acoustic panel, providing unparalleled flexibility and customization.

Just Black
Acoustic

Just Black System

- Features a purist and sleek black finish with a hyper-miniaturized 5mm track width, creating a sophisticated and modern look ideal for hotels, restaurants, and residential areas.
- Available in three versatile versions—trimless for a seamless appearance, rectangular surface-mounted for a bold statement, and round suspended for a modern touch—this system can be tailored to suit any design need.
- With bends and L-connectors, allows for dynamic and customized lighting layouts. It is mountable on both ceilings and walls, extending its application possibilities and offering versatility for any lighting project.
- The inserts are magnetically attached, ensuring easy installation, replacement, and combination. These inserts provide unparalleled flexibility with options such as spotlights for focused lighting or continuous LED lines for homogeneous illumination.

Just Black
System

Loop

- Integrates energy-efficient LED technology for sustainable lighting solutions.
- Available in three distinct shapes to suit different spatial and aesthetic requirements.
- Combines the classic elegance of a chandelier with a contemporary twist, ideal for both traditional and modern interiors.
- Designed by renowned designer Tom Dixon, ensuring high-quality craftsmanship and artistic appeal.

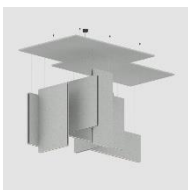

Loop

Lullaby

- Combines elegant aesthetics with functionality, blending sound absorption and illumination for a unique lighting experience.
- Choose from six unique luminaires to create your own light sculpture or select from pre-configured combinations. Lullaby's six panels come in three versatile shapes – horizontal rectangle, vertical rectangle, and square.
- Customize your lighting with 32 acoustic color options and a range of LED temperatures from 2700K to 4000K, all featuring a high CRI above 90 for superior light quality.
- Lullaby is equipped with innovative microfiber reflectors that ensure directed light and minimal glare, enhancing both visual comfort and the overall ambiance of your space.

Lullaby

Minimal Track

– Light Inserts

- Seamlessly combines decorative pendants, spotlights, linear diffused lights, and task lights, ensuring uniformity and versatility for any space.
- Offers a range of purposeful and unique lighting elements, from spotlights like Imagine Micro to iconic pendants like Snooker and Hangover, enhancing the aesthetics of any design concept.
- Includes 90° connectors, T and X connectors, and curved connectors (45°, 90°, 180°), allowing for custom configurations and on-site adjustments to meet specific project needs.
- Features renowned luminaires and new additions like Bilo and Snooker Glass, bringing a touch of timeless elegance and expanding the selection for creative lighting solutions.

Minimal Track

Oiko Pro Round

- Suspension

- Oiko Pro is also available in a round shape for the suspended version.
- Match the luminaire precisely to your room concept or create distinct accents with Oiko Pro's customizable options.
- Choose from four different textile cable designs, available in lengths up to 6000mm.

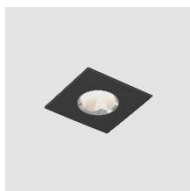

Oiko Pro
Round

Oiko Pro Square

- Features the Oiko Pro reflector in multiple applications, allowing the square form to integrate seamlessly into various design concepts without compromising LED performance.
- Available in surface mounted, recessed, trimless, and suspended options, providing limitless installation possibilities for any project.
- Boasts a minimalistic design that blends effortlessly into architecture, ensuring the focus remains on its impeccable light emission.
- Maintains sharp beam angles and high LED performance across different form factors, delivering consistent and high-quality lighting.

Oiko Pro

Slider

- Slider is a groundbreaking innovation that redefines ease and efficiency in lighting installation. Slider promises a harmonious fit with its revolutionary design.
- Its sleek design, high lumen output, and customizable lens options empower you to craft the desired lighting mood.
- This lighting system achieves exceptional efficiency with excellent glare control, catering to all lux value requirements for workplace lighting.
- With diverse L, T, and X modules, Slider adapts to your spatial needs, delivering an exceptional lighting experience that's uniquely yours.

Slider

ARCHITECTURAL

Upcoming Launches

Centaur

- Centaur is purpose-built to create a soft, indirect light that gently illuminates spaces, mimicking the effects of cove lighting. This design provides a warm, ambient glow that enhances the atmosphere without harshness. Its easy installation makes it an ideal choice for achieving this sophisticated lighting effect with minimal effort.
- Centaur is designed to seamlessly integrate into architectural spaces, enhancing environments with its discreet profile and refined aesthetic.
- Featuring an advanced LED strip and opal diffuser, Centaur delivers efficient and uniform illumination, perfect for highlighting architectural features and creating visual interest.
- The recessed profile of Centaur allows for versatile installation on both plasterboard and masonry, enabling the creation of linear luminous compositions on walls or ceilings to suit various design preferences.
- Centaur shapes light with precision, adding both functional lighting and aesthetic value by accentuating structural elements and defining spaces with clarity and sophistication.

Kardan

- Kardan features one or two adjustable and independent light sources, allowing precise control over lighting direction and intensity to highlight specific areas or objects.
- The innovative design offers unparalleled flexibility in orientation, making it ideal for display areas, shop windows, museums, and art galleries where accent lighting is crucial.
- Designed to deliver uniform lighting, Kardan enhances intricate details and textures, ensuring objects are showcased with clarity and sophistication.
- With its clean and essential design, Kardan seamlessly integrates into various interior styles, providing aesthetic appeal while maintaining functional excellence in any environment.

Quantum Acoustic

- The Quantum collection now features integrated acoustic panels in its luminaires, transforming their previously hollow interior into a functional design element. This enhancement improves sound quality by reducing reverberation and enhancing acoustic comfort in any environment.
- The addition of acoustic materials not only improves sound performance but also enhances the visual appeal of the Quantum luminaires. It adds a sophisticated touch to modern interiors while maintaining the sleek and minimalist design of the collection.
- Ideal for various settings including offices, educational institutions, and hospitality spaces, the Quantum luminaires with acoustic enhancement offer versatile solutions for both lighting and acoustic needs, ensuring optimal comfort and aesthetics.
- Designed with innovation in mind, the integration of acoustic panels into the Quantum luminaires seamlessly combines functionality with aesthetic appeal, catering to the demands of contemporary interior design while enhancing overall room ambiance.

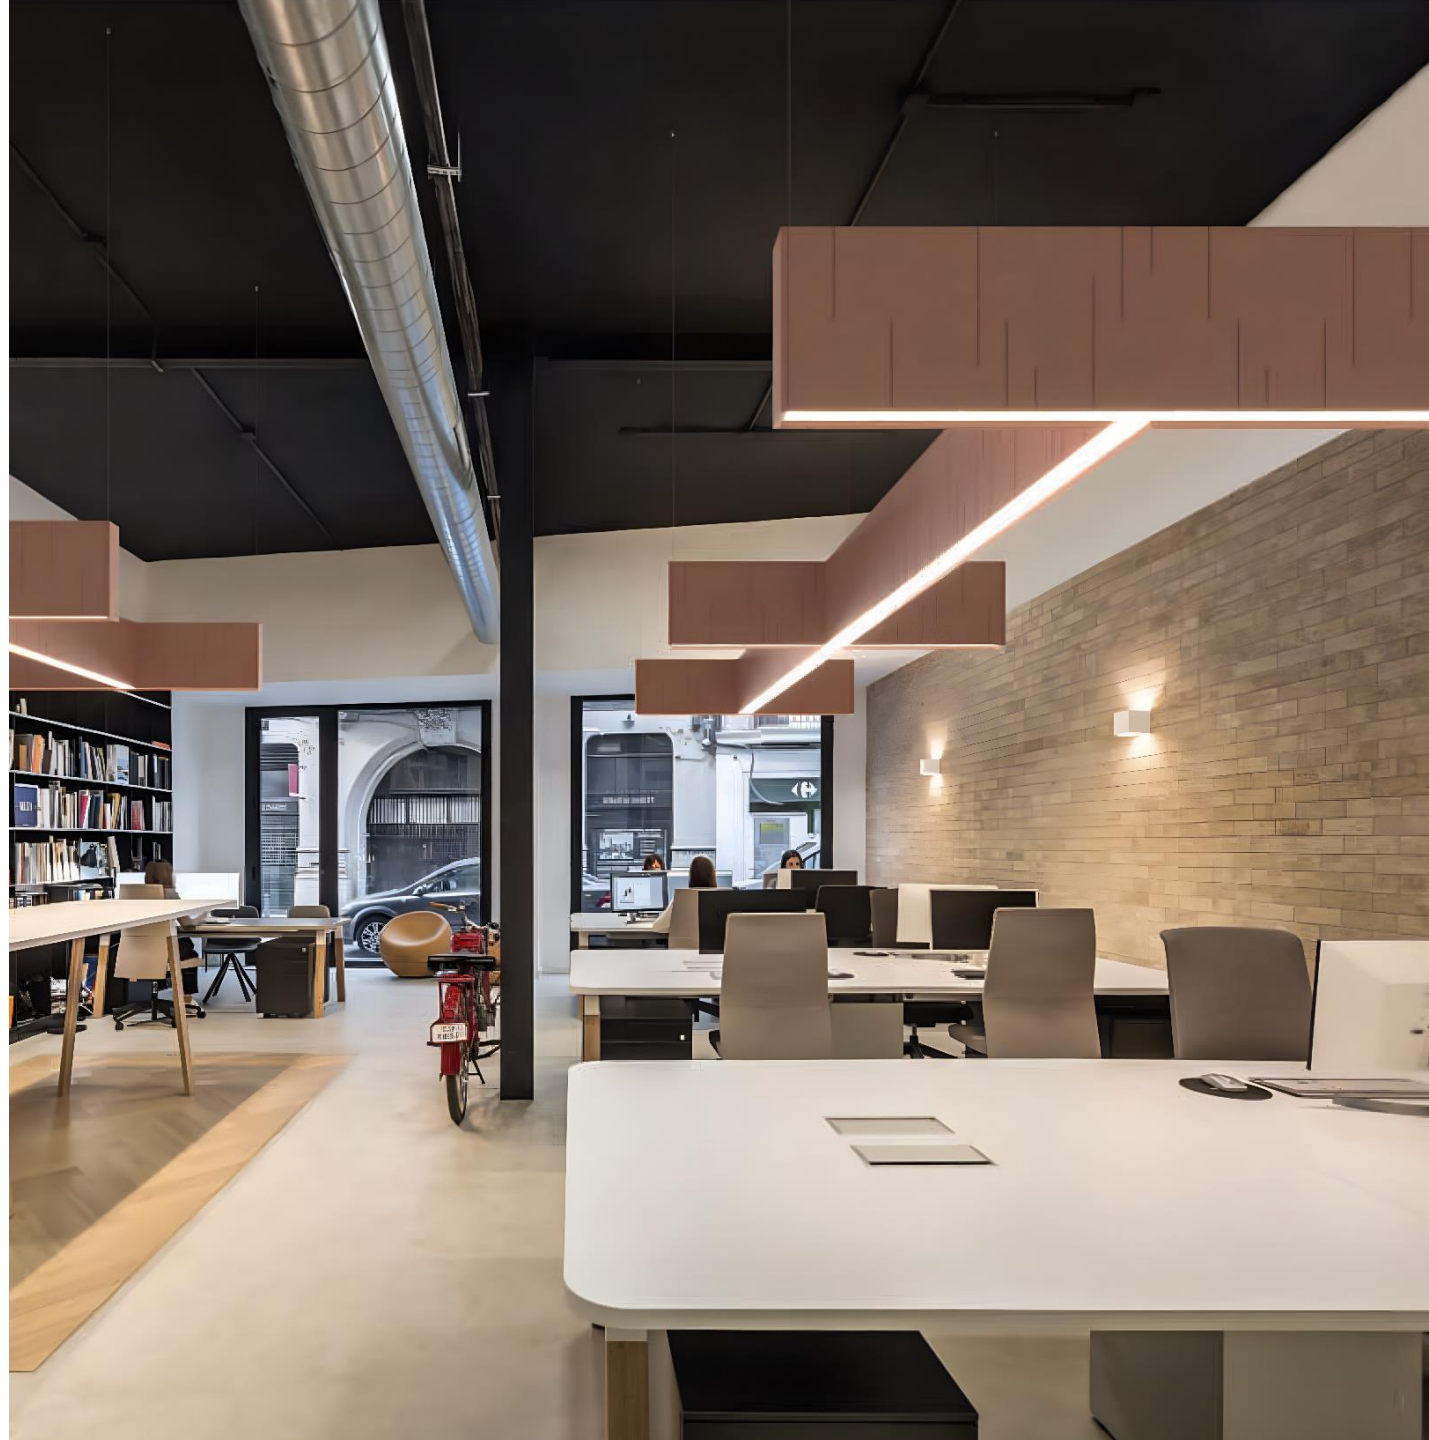

Quantum Acoustic Light Panel

- Quantum Acoustic Light Panel offers indirect lighting, ensuring a seamless appearance on ceilings. This feature provides uniform illumination while maintaining a sleek and modern aesthetic without visible light sources.
- Designed to complement the Quantum luminaires, these panels contribute to improved room acoustics by reducing reverberation and enhancing sound absorption. They create a more comfortable and productive environment by minimizing noise distractions.
- With a popular geometric shape, the Quantum Acoustic Light Panels introduce new possibilities for lighting design. They allow for creative configurations and layouts, suitable for diverse settings such as offices, educational facilities, and hospitality environments.
- Available in 32 vibrant colors, the Light Panels offer extensive customization to match various interior styles and preferences. Whether aiming for a bold statement or harmonizing with existing decor, these panels provide flexible options to suit any space.

Unity

- Combines acoustic materials with superior lighting to optimize comfort and well-being in any space.
- Vertical modules clad in sound-absorbing materials, available in 32 colors, offer versatile configurations from groupings to seamless lines.
- Includes Y, X, T, L, and straight modules that seamlessly merge to adapt to various environments and aesthetics.
- Offers specialized lighting options such as Opal, Microprism, Glare Control, Raster, Wall Wash, and Double Asymmetric, tailored for diverse spatial and functional needs.

Victory Acoustic

- The Victory collection now incorporates integrated acoustic panels within its luminaires, transforming their hollow interior into a functional design element. This enhancement effectively improves sound quality by reducing reverberation and enhancing acoustic comfort in any environment.
- By integrating acoustic materials, the Victory luminaires not only enhance sound performance but also add visual appeal to spaces. They blend seamlessly into modern interiors while maintaining the collection's aesthetic and functional integrity.
- Suitable for a variety of settings including offices, retail spaces, and hospitality environments, the Victory luminaires with acoustic enhancement offer versatile solutions for both lighting and acoustic needs. They contribute to creating comfortable and productive spaces with improved acoustic conditions.
- The design integration of acoustic panels into the Victory luminaires showcases innovation in lighting technology and acoustic solutions. It underscores a commitment to enhancing both aesthetic quality and environmental comfort in contemporary interior design.

Victory Acoustic Light Panel

- Victory Acoustic Light Panel offers indirect lighting, ensuring a seamless appearance on ceilings. This feature creates a uniform illumination that enhances the overall aesthetic while minimizing glare.
- Designed to complement the Victory luminaires, these panels contribute to improved room acoustics by reducing echoes and enhancing sound absorption. They help create a more comfortable and productive environment by minimizing noise distractions.
- With a popular geometric shape, Victory Acoustic Light Panels introduce new possibilities for lighting design. They allow for creative arrangements and configurations, suitable for various settings including offices, hospitality spaces, and residential interiors.
- Available in 32 vibrant colors, the Light Panels provide extensive customization to match different interior styles and preferences. Whether creating a bold statement or blending seamlessly with existing decor, these panels offer flexible options for any space.
