New Products

Agile 60

- Made from hard anodized aluminum with an IP66 rating, Agile 60 is built to withstand harsh outdoor environments.
- Compatible with Soraa snap system and other GU10 lamps up to 7.5W, offering customizable lighting solutions for various outdoor settings.
- Features a magnet snap system for easy on-site adjustments and accessory changes, ensuring adaptability and convenience.
- Additional installation accessories are available, like a ground spike and tree strap, along with optional anti-glare snouts and a honeycomb louvre for enhanced light control.

Agile 60

Airliner

- Airliner features linear slits along its body that create a dynamic, ever-changing light projection, adding movement and visual interest to outdoor spaces.
- Available in surface, suspension, and bollard configurations, Airliner offers flexibility for various outdoor applications, making it adaptable to different environments.
- The interplay of light and form infuses exterior spaces with energy and vibrancy, transforming the atmosphere with a unique and engaging lighting effect.
- With its striking design, Airliner leaves a lasting impression on any landscape, elevating the aesthetic of gardens, walkways, and other outdoor settings.

Airliner

Apollo

- Apollo Portable offers up to 8 hours of battery life with an IP66 rating, making it suitable for both indoor and outdoor use. The USB-C port is also protected for added durability.
- Both Apollo Portable and Apollo Post feature a minimalist, slim form that blends seamlessly into any environment, with a range of finishes and customization options available.
- Apollo Post is dark-sky compliant and equipped with a Smart Shield protection system, ensuring a warm, inviting glow while minimizing light pollution.
- Apollo Post offers various mounting systems and comes in different heights, with custom height options available, powered by a reliable 24Vdc supply.

Apollo

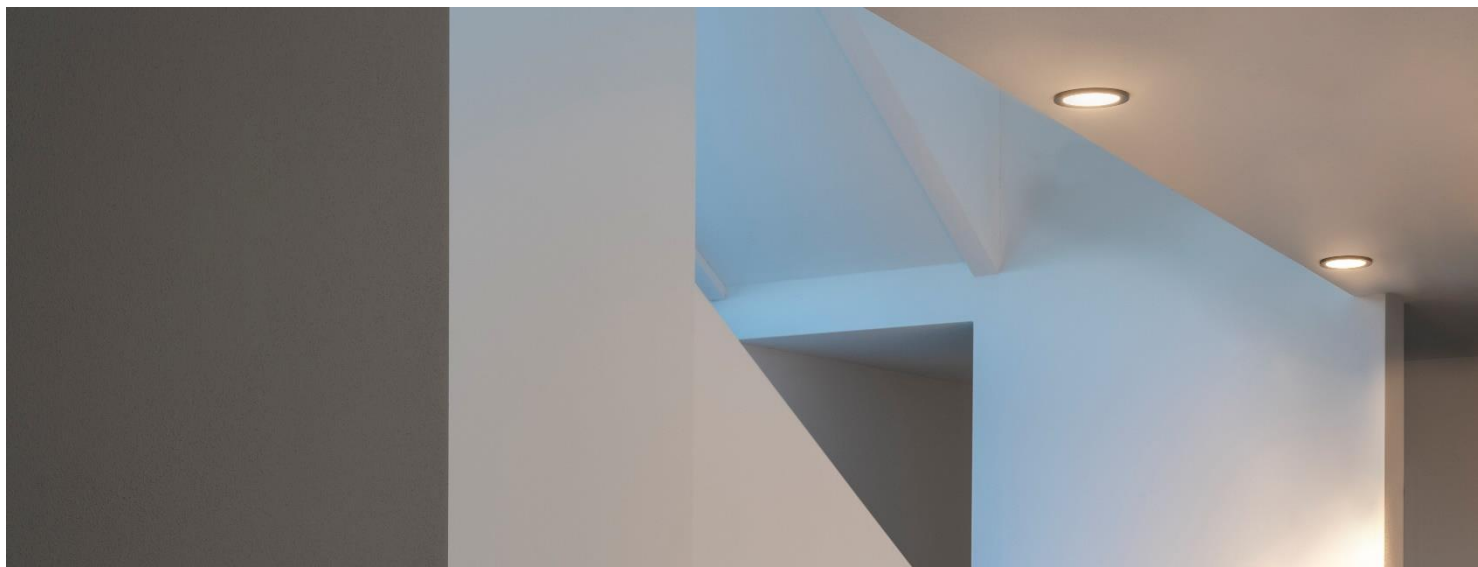

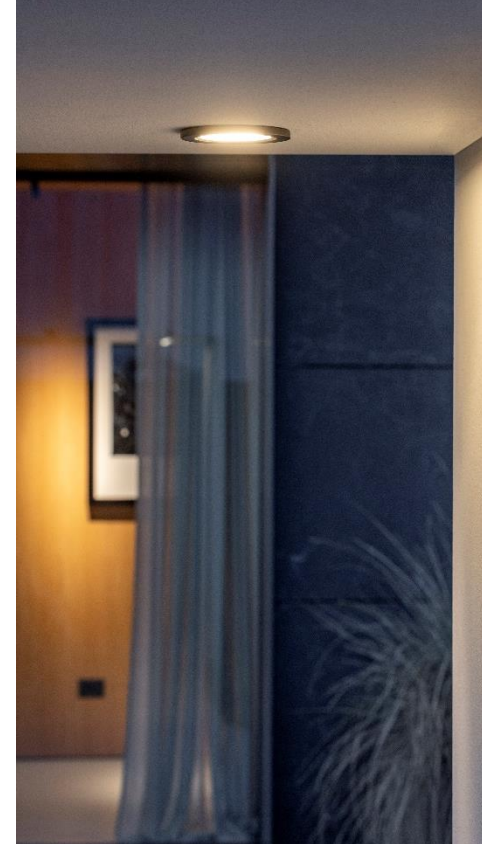

Aster

- Available in two versions, Basic and Pro, Aster caters to various preferences. The Basic version offers reliable performance with a 220-240V line voltage LED, while the Pro version provides advanced control with remote dimmable power supply units, allowing users to adjust settings for ON/OFF functionality, output currents, and dimming.
- Aster's RGBW LED option adds a dynamic and vibrant dimension to lighting designs. Users can choose from three different sizes - small, medium, and large - to seamlessly match their space and lighting needs.
- Designed with precision, Aster's optics are optimized for downlighting, offering a range of lighting options from narrow, focused beams to asymmetrical dispersion. This flexibility enables users to tailor their lighting to suit their specific space and ambiance requirements.

Aster

Astral Trellis

- Astral Trellis creates an immersive outdoor experience with constantly shifting geometric patterns, casting intricate shadows that evolve over time.
- Crafted from high-quality stainless steel, the fixture is both durable and visually striking, offering a refined aesthetic to outdoor spaces.
- The precisely perforated head generates mesmerizing silhouettes, adding an artistic element that transforms walls and landscapes into canvases for ever-changing light patterns.
- Available as both surface and portable lights, Astral Trellis provides flexibility in how it enhances outdoor environments, making it suitable for various settings and applications.

Astral
Trellis

Bimba

- Available in an outdoor version rated at IP66, ensuring durability and suitability for outdoor environments, expanding its potential applications beyond indoor spaces.
- Part of the "Oceans Without Plastic" sustainability effort, Bimba is produced with a polyester cord made from recycled plastic bottles, contributing to environmental conservation by reusing plastic material.
- Bimba features a striking combination of materials and colors, with braided rope on a metallic frame, creating a stunning visual appeal.
- Choose from standard color options or explore an extended list of choices, allowing for personalized customization.

Bimba

Chiodino

- Seamlessly blends into outdoor spaces with its versatile elegance and minimalist design, whether concealed among foliage or proudly on display.
- Illuminates its surroundings with a powerful glow, enhancing the beauty of gardens or accentuating large floral arrangements.
- Allows for the creation of compositions by mixing and matching bollards of varying heights.
- Available in three distinct heights, the Chiodino collection offers flexibility in design.

Chiodino

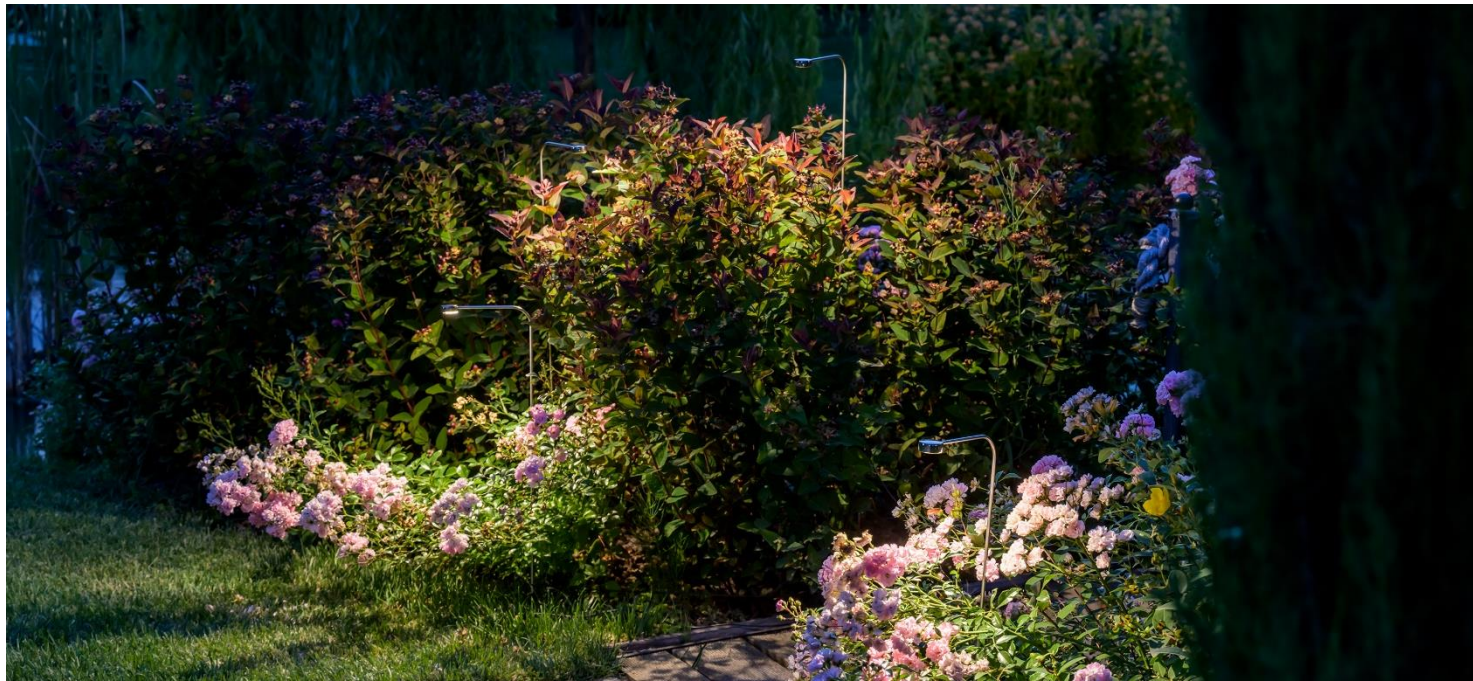

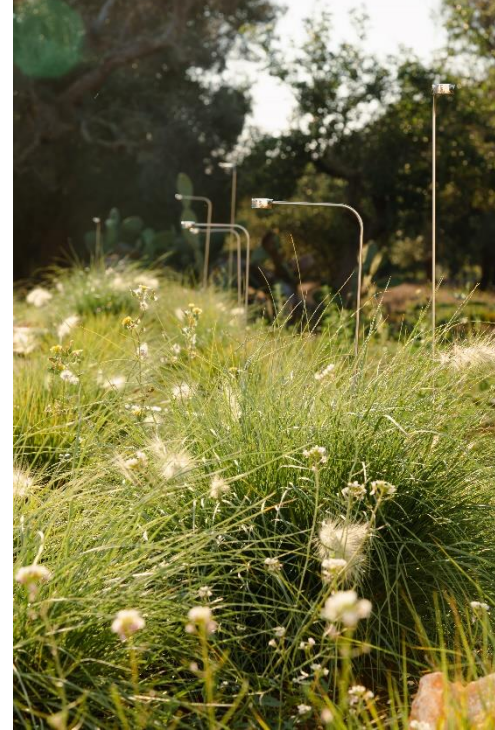

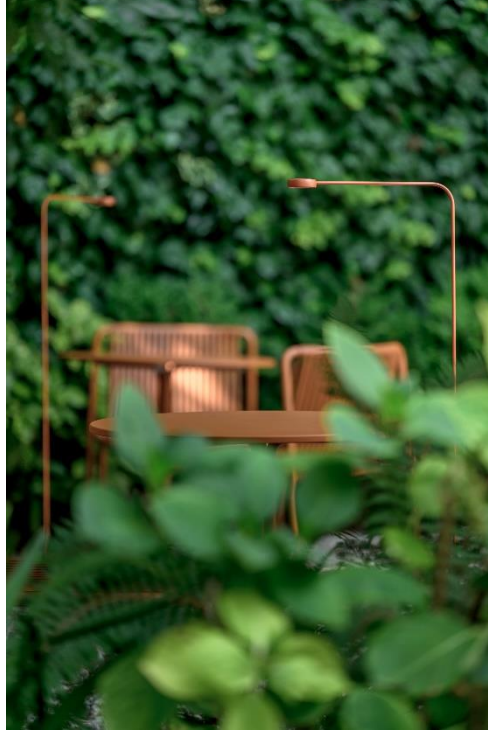

Dot

- Dot epitomizes hyper-minimalism, seamlessly integrating elegant lines for impactful landscape illumination, concealable in planters or walkways.
- Incorporates cutting-edge LED technology and expertise, resulting in a compact yet powerful light source that doesn't overshadow what truly matters.
- With a screened light source ensuring superior visual comfort and boasting an IP65 protection rating, Dot is built to withstand the elements while providing an exquisite outdoor lighting experience.
- Dot provides versatility and style with options as a portable floor lamp or a fixed post lamp, offered in various heights to illuminate your outdoor spaces effectively.

Dot

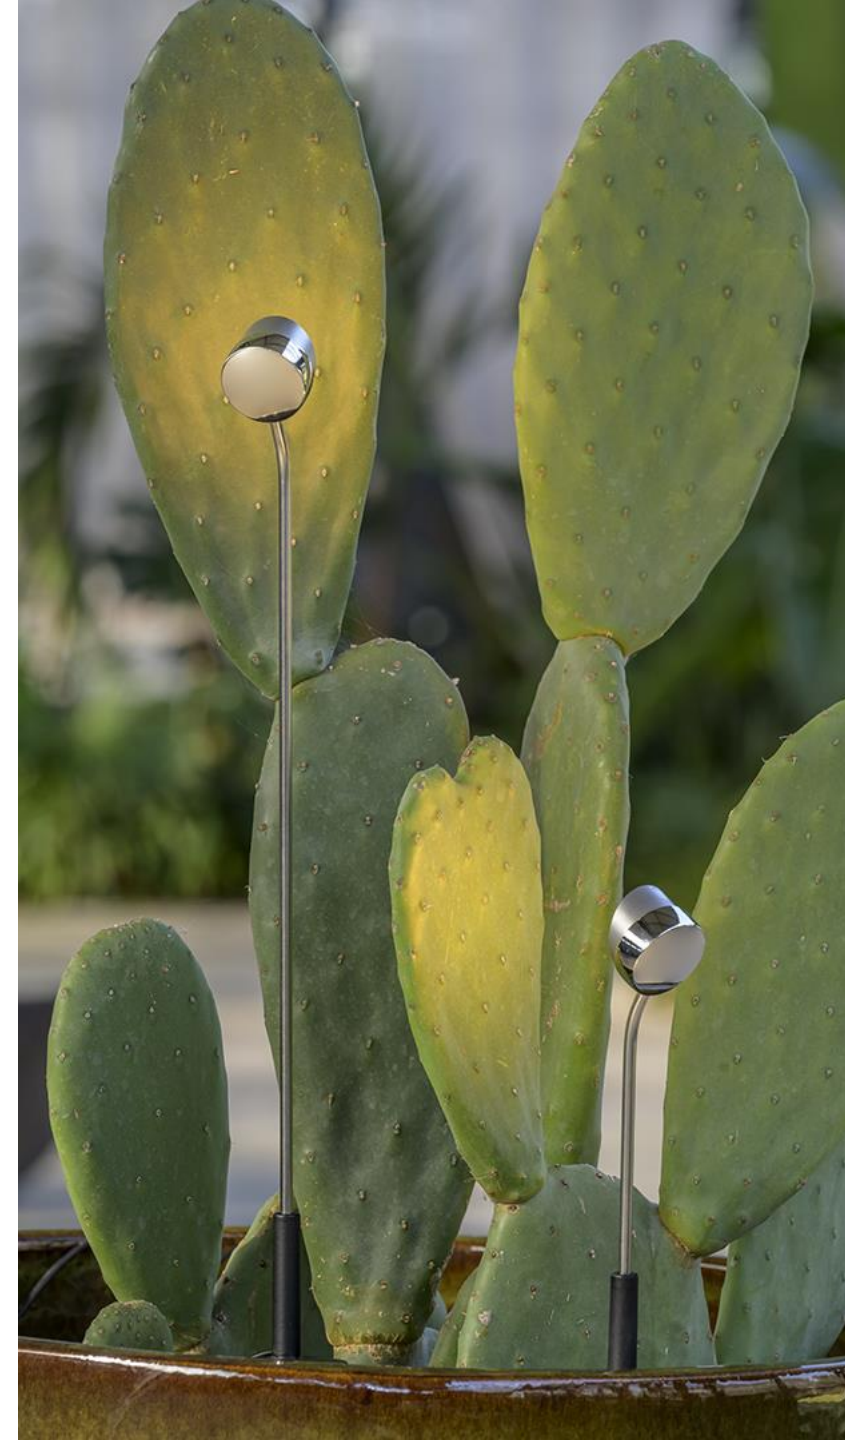

Dot Me Up

- Dot Me Up is a bollard series that blends nature and minimalism with a delicate floral design that integrates effortlessly into outdoor spaces.
- Its soft, upward illumination adds a gentle glow to gardens, while the adjustable stem lengths allow flexibility to suit a variety of settings and ensure every corner is beautifully lit.
- With efficient LEDs, expert craftsmanship, and technical precision, Dot Me Up delivers a lighting solution that feels both subtle and impactful.
- Made from stainless steel AISI 316L, the fixture offers durability and a refined presence, with direct light distribution completing its thoughtful design.

Dot

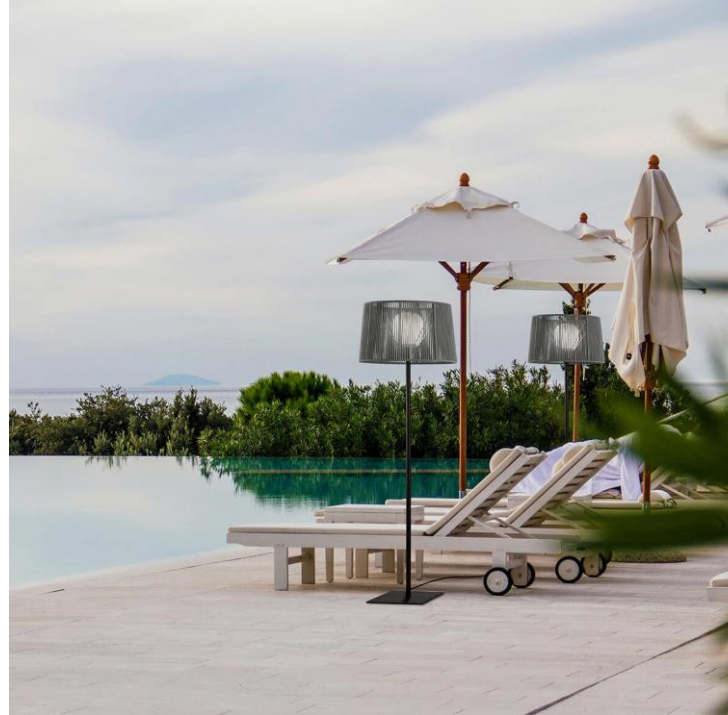

Drum

- Part of the "Oceans Without Plastic" initiative, Drum contributes to reducing plastic material in the environment by reusing it in durable products, aligning with eco-conscious values and promoting environmental stewardship.
- Drum is now available for outdoor use with a version rated at IP66, ensuring durability and performance even in outdoor environments, expanding its potential applications.
- Draws inspiration from the unique shape of ethnic instruments and textile materials, featuring a metal frame and handmade braided cord for the lampshade, creating a distinct and eye-catching aesthetic.

Drum

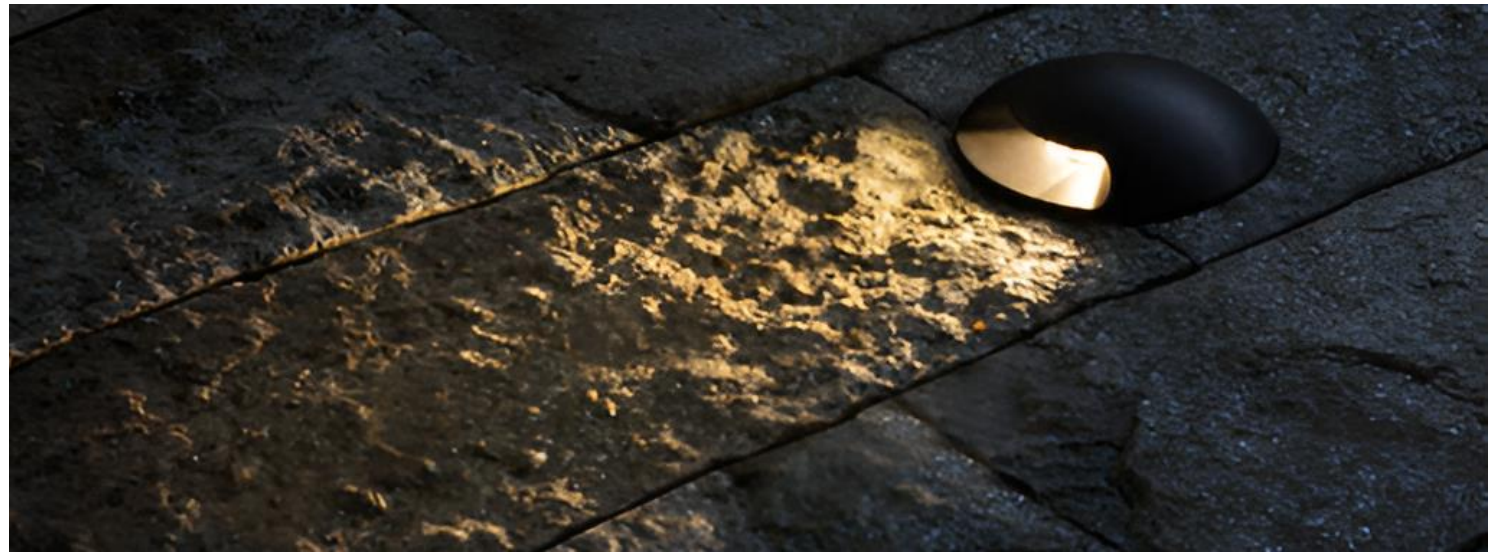

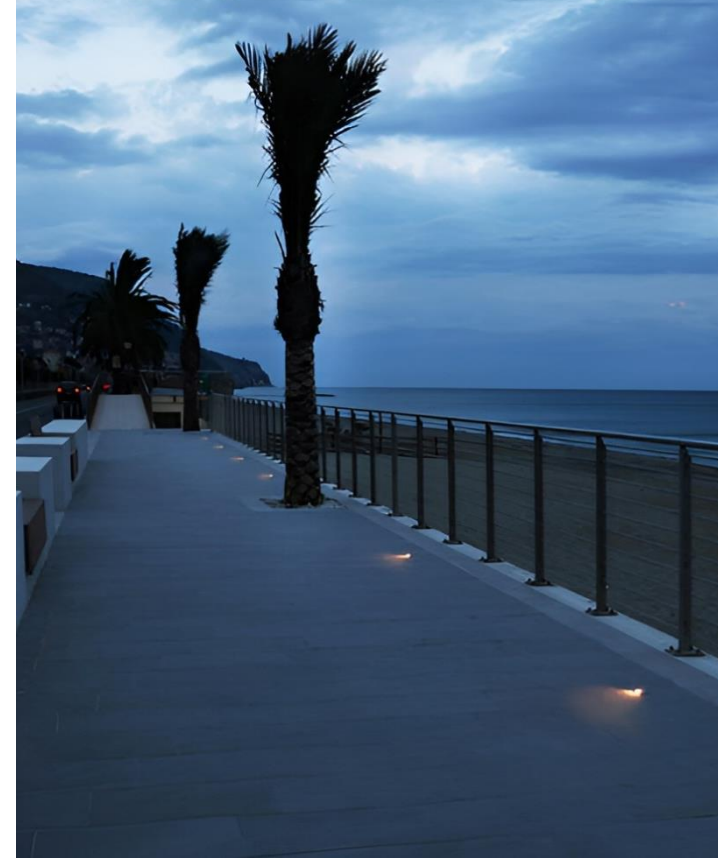

Explorer 65-1

- Available with 1 or 2 windows and a range of color temperatures (2200K, 2700K, 3000K, 4000K) for flexible ambiance customization.
- Features a superior 90CRI, ensuring excellent color accuracy and vibrant illumination.
- Crafted from premium materials such as AISI316L marine-grade stainless steel, aged solid brass, or pre-aged solid brass, with a hard-anodized aluminum heatsink for enhanced durability.
- With a static load resistance of 2500 kg and an IP68 rating, it ensures reliable performance in any weather condition. Equipped with dedicated anti-glare optics and a Smart Shield system for optimal light quality and protection.

Explorer 65-1

Explorer 65-2

- Compact radial floor washer designed to illuminate flat surfaces, decks, and pathways with exceptional accuracy.
- Withstands a static load of up to 2500 kg, ensuring long-lasting performance in demanding environments.
- Available in unique finishes, including stainless steel, aged solid brass, and pre-aged solid brass to complement the design of any setting.
- Features an IP68 rating and Smart Shield protection system for reliable performance in all weather conditions.

Explorer 65-2

Explorer 125-1

- Features a static load resistance of 2500 kg and dedicated anti-glare optics, ensuring durability and optimal light performance.
- Offers three standard color temperatures (2700K, 3000K, 4000K) and an impressive 90CRI for vibrant and accurate color rendering.
- Made from premium AISI316L marine-grade stainless steel, aged solid brass, or pre-aged solid brass, with a hard-anodized aluminum heatsink for durability and elegance.
- Equipped with a Smart Shield system and operates on a 24Vdc power supply, providing reliable protection and efficiency.

Explorer 125-1

Fessura

- Redefines exterior lighting by transforming facades into works of art, thanks to its innovative design inspired by the graceful cut of light from a shooting star.
- Features a modular recessed design that allows for complete concealment and channeling of light, enabling flexible compositions to create customized lighting effects.
- With its blade of light, Fessura artfully highlights exterior architectural elements, merging functionality with artistic expression to create captivating scenes and enhance the visual appeal of any exterior space.

Fessura

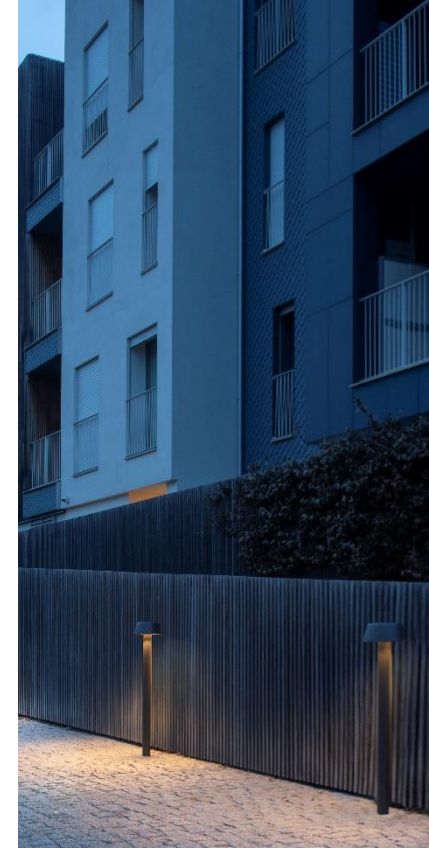

Font

- Crafted with precision optics, Font offers a diverse range of lighting distributions to suit different outdoor lighting needs. From street beam illumination for pathways to diffused dispersion for ambient lighting, Font provides versatile options to enhance safety.
- Its essential forms and vintage aesthetics evoke a sense of classic charm that effortlessly enhances any outdoor space, from traditional gardens to contemporary urban landscapes.
- Whether used as a single luminaire or as part of a coordinated lighting scheme, its versatile design ensures harmonious integration into any landscape, adding a touch of elegance and functionality.

Font

Frog

- Featuring a sleek hockey puck design, this outdoor projector/flood light combines style with functionality.
- Frog can be installed in the ceiling, similar to a track system, offering enhanced functionality and flexibility for illuminating exterior settings.
- The Line Voltage LED eliminates the requirement for a separate remote power supply, streamlining the installation process.
- Offers versatile mounting options with bracket or pole mounting accessories, and additional glare control features such as a Snoot or Honeycomb louver for enhanced customization.

Frog

Illa

- Seamlessly blends rustic charm with contemporary elegance, Illa is uniquely made with esparto grass (obtained sustainably from various wild plants) and white-finished metal, creating a unique and stylish lighting fixture.
- Whether suspended individually or in clusters, Illa creates a captivating ambiance, ideal for illuminating dining spaces and enhancing the atmosphere with a soft, inviting glow.
- Available for outdoor use with a version rated at IP66, ensuring durability and performance even in outdoor environments, making it a versatile lighting solution for both indoor and outdoor settings.

Illa

Kora

- Features a classic bell-shape design crafted from home-made braided cords, adding a touch of timeless elegance to any space.
- Part of the "Oceans Without Plastic" initiative, Kora contributes to reducing plastic material in the environment by reusing it in durable products, aligning with eco-conscious values and promoting environmental stewardship.
- With an outdoor version rated at IP66, Kora provides both indoor and outdoor lighting solutions, making it suitable for a wide range of environments.

Kora

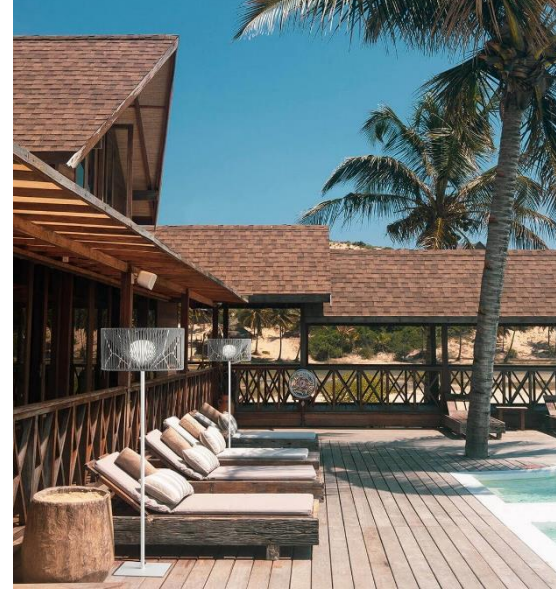

Mariola

- Features lampshades made from hand-braided cords constructed from recycled plastic bottles, showcasing commitment to sustainability and original artisanal craftsmanship.
- The visible metal structure, delicately woven with hand-braided cord material, creates a unique and visually appealing pattern, adding a touch of elegance and character to any space.
- Emits a soft and comfortable light, enhancing the ambiance of the surroundings and providing a welcoming atmosphere for any environment.
- With an outdoor version rated at IP66, Mariola ensures durability and performance in both indoor and outdoor settings, expanding its potential for use in diverse environments.

Mariola

Mini One 2.0

- Designed with a stylish geometric cube shape, the Mini One 2.0 features a seamless appearance that integrates smoothly into any architectural setting. The absence of visible screws and wall mounts ensures a clean, minimalist look that complements its surroundings.
- Customizable lighting solutions with options for two-window or four-window configurations, as well as a unique "blade of light" version.
- Constructed from high-quality EN 44300 aluminum alloy with a low copper content, the Mini One 2.0 is built for durability. Its robust die-cast body and flange are designed to withstand the elements, making it a reliable choice for exterior lighting.

Mini One 2.0

Onna

- Features hand-braided cords made from recycled plastic bottles, showcasing commitment to sustainability and originality in design through unique artisanal methods.
- The cords of Onna are intertwined across the metal structure, creating an organized-chaos appearance that adds a distinctive and eye-catching effect to any space.
- Available in a wide range of color finish options, Onna allows for customization to match various interior styles and preferences, providing versatility in design.
- With an outdoor version rated at IP66, Onna ensures durability and performance in diverse environments, expanding its potential for use in different settings.
- The exterior version of Onna now offers larger sizes, expanding its versatility and impact in outdoor spaces. The fixtures in this series now come in sizes ranging from 420mm (16.5") to an impressive 900mm (35.4") in diameter.

Onna

Poma

- Features a distinctive design with a braided cord on a metallic structure, particularly woven in a new zigzag style, adding a unique and visually appealing element to any space.
- Filters light in a beautiful and original way through its hand-braided cords, adding charm and character to any environment, enhancing the ambiance with a captivating play of light and shadow.
- Part of the "Oceans Without Plastic" initiative, Poma contributes to reducing plastic material in the environment by reusing it in durable products, aligning with eco-conscious values and promoting environmental stewardship.

Poma

Rippling

- Rippling is designed for surface wall and ceiling applications, offering versatility in how it can be used to illuminate outdoor spaces.
- Choose between small and medium sizes to best fit your design and lighting needs, allowing for tailored solutions that complement various architectural and landscape elements.
- Rippling seamlessly combines technical precision with striking decorative appeal, enhancing the visual allure of its surroundings with captivating reflections of light and shadow.
- This exterior light fixture effortlessly merges with its environment, creating a harmonious interplay of light and architecture that goes beyond functionality to become an integral part of the overall design.

Rippling

Savina

- Features a simple yet elegant design, with handmade braided cord on a conical metal structure, adding a touch of sophistication to any space.
- Ideal for high-ceiling areas, Savina's suspended light fixture can be combined with two sizes from the collection to create an elegant effect and focus the light, making it perfect for various settings and spatial requirements.
- Produced with a polyester cord made from recycled plastic bottles, Savina supports sustainability efforts while offering durability and longevity.
- With an outdoor version rated at IP66, Savina ensures suitability for outdoor use, expanding its potential applications for both indoor and outdoor environments.

Savina

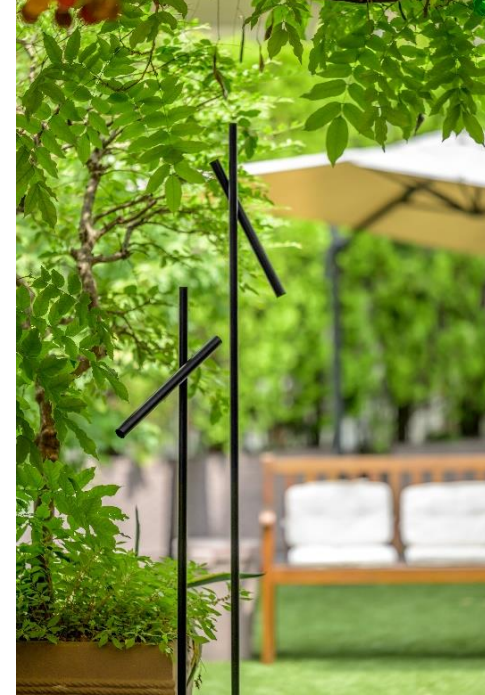

Shanghai

- Shanghai is a bollard collection that blends minimalistic contemporary aesthetics with functionality, inspired by the dynamic play of lines in the timeless game of pick-up sticks.
- Features adjustable light fixtures that rotate up to 180°, allowing for personalized lighting scenarios and adaptable outdoor ambiance.
- Available in three heights, 800mm, 1,200mm and 1,500mm, Shanghai caters to various preferences and spatial needs, offering stylish solutions for pathway illumination.
- Available in seven different color finish options, the sleek, stick-shaped design enhances both functionality and aesthetics, making it a versatile choice for modern outdoor spaces.

Shanghai

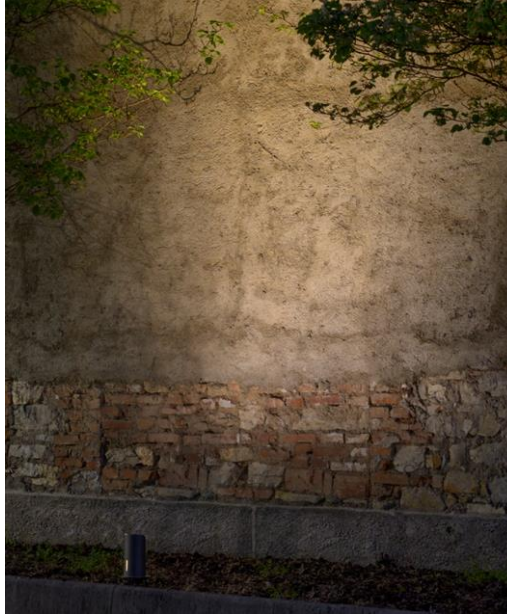

Shield

- Shield is designed to enhance architectural shapes with unparalleled elegance, adding a refined decorative element to your outdoor spaces.
- Featuring a distinctive curved wall that gracefully rises on one side of the recessed light, Shield creates a beautiful diffused light source that accentuates expansive landscape areas.
- Shield offers versatility with three different sizes, allowing for customized installations that perfectly match the scale and design of various outdoor environments.
- Combining innovative design with the practicality of an exterior light fixture, Shield elevates the aesthetics of your surroundings while providing reliable and effective illumination.

Shield

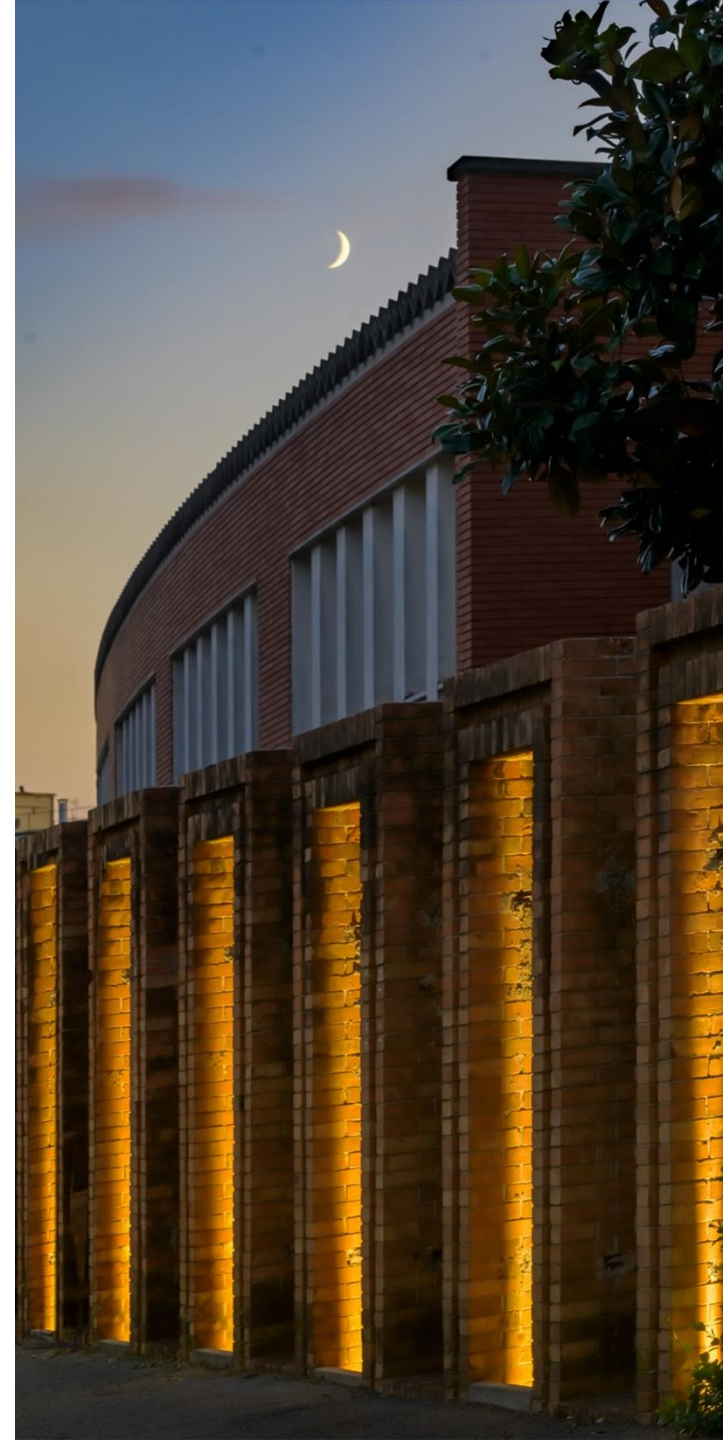

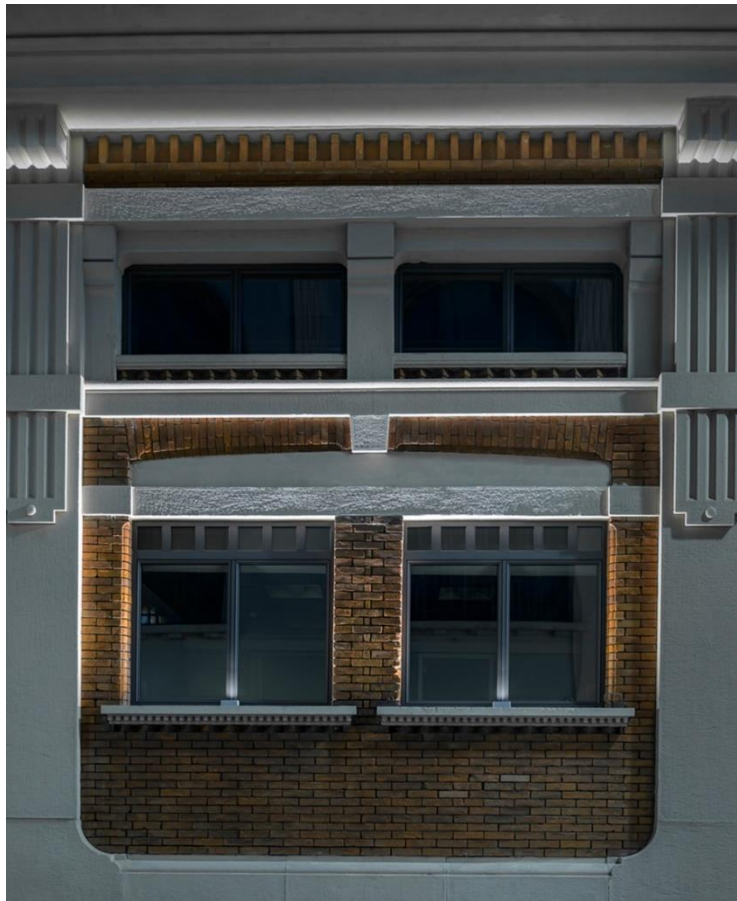

Sill

- Sill is a window-sill mounted light designed to highlight architectural beauty with a soft, captivating glow, ideal for a variety of exterior applications, including commercial, hospitality, and residential.
- Built to endure harsh weather, its IP65 and IK08 ratings ensures durability and reliable performance in outdoor environments.
- Features a distinctive convex lens that delivers a precise 100x5- or 100x8-degree beam, perfect for emphasizing window frames or creating ambient illumination.
- With its elegant and smart design, Sill enhances exterior architecture effortlessly, adding a distinctive style.

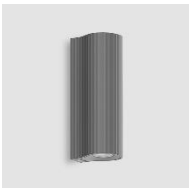

Sill

Sister Ray

- Sister Ray is a surface wall light series that combines performance with aesthetic appeal through its uniquely jagged profile and compact form. Its signature cone-shaped design projects beautifully, enhancing any space while maintaining a sleek, modern look.
- This IP65-rated fixture features a screw-free top with a subtle convex surface to ensure efficient water drainage, making it perfect for outdoor applications. The light source is cleverly concealed within a concave profile, reducing glare and focusing illumination where it's needed most, providing excellent visual comfort.
- Crafted with precision, Sister Ray is built from extruded aluminum alloy and stainless steel, with components meticulously assembled using CNC machining techniques. The silkscreened glass diffuser ensures clean, pristine light projection.
- Available in multiple finishes, with Black as an option upon request, Sister Ray blends durability, elegance, and technical excellence.

Sister Ray

Spiare

- Spiare is a recessed luminaire with a sleek, minimalist design that remains hidden until illuminated, creating captivating and enveloping light effects.
- Features a seamless appearance with no visible screws, enhancing its clean and unobtrusive aesthetic.
- Made from durable transparent polycarbonate, with a customizable glass diffuser available in various colors to suit different lighting preferences.
- Ideal for adding a touch of elegance and allure to any space with its refined and understated design.
- Spiare is available in six different color finish options, including bronze, anthracite, and corten, to appeal to a variety of design styles and needs.

Spiare

Target - On Pole

- Made from corrosion-resistant, die-cast aluminum alloy, ensuring durability in harsh outdoor environments.
- Anodizing treatment, epoxy powder base coating, and polyester painting provide enhanced protection and six stylish color finishes.
- Available in three sizes with lumen outputs ranging from 775 to 3,225 lumens, catering to different lighting needs.
- Rated IP66 for excellent ingress protection against dust and powerful water jets.
- IK06 impact resistance ensures the fixture withstands physical impacts.

Target

Tina

- Tightly wrapped handmade cords along metallic structures offer a unique design suitable for any space, providing distinctive aesthetics and effective light distribution.
- Available in two diameters and fifteen different color finish options, Tina allows for customization to match various interior styles and preferences, ensuring versatility in design.
- Produced with a polyester cord made from recycled plastic bottles, Tina supports sustainability efforts while offering durability and performance.
- With an outdoor version rated at IP66, Tina ensures suitability for outdoor use, expanding its potential applications for both indoor and outdoor environments.
