Expert Collaboration ..... 10

Light has the power to shape perception through reflection, diffusion, direction, and shadow. Our collection of luminaires is designed to create distinct visual experiences from soft wall grazing to precise accent lighting. Today's lighting trends focus on transforming spaces through atmosphere, emotion, and creative expression, allowing light to become an essential element that enriches environments with depth, warmth, and character.

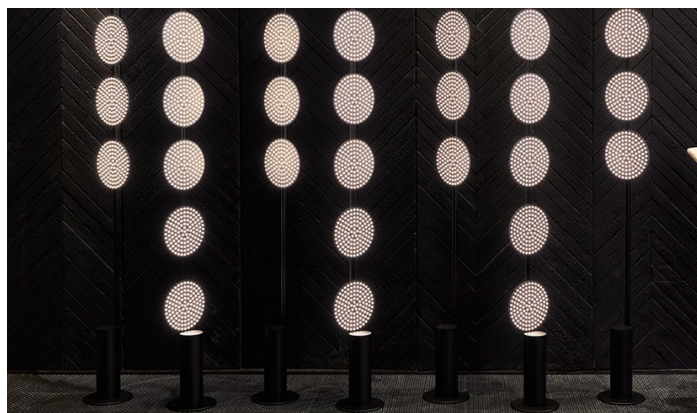

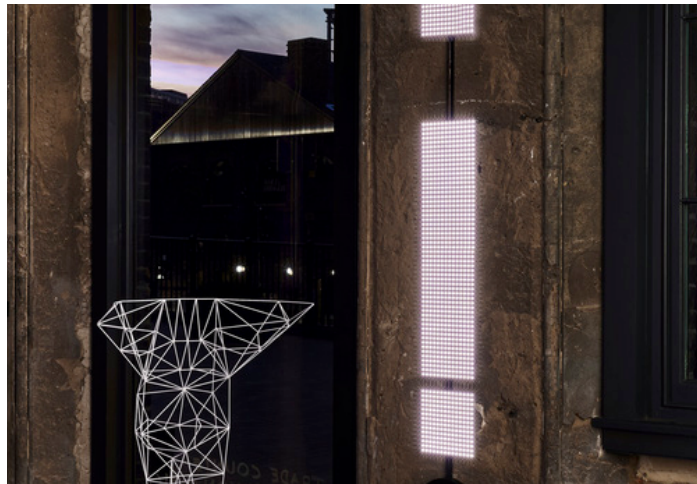

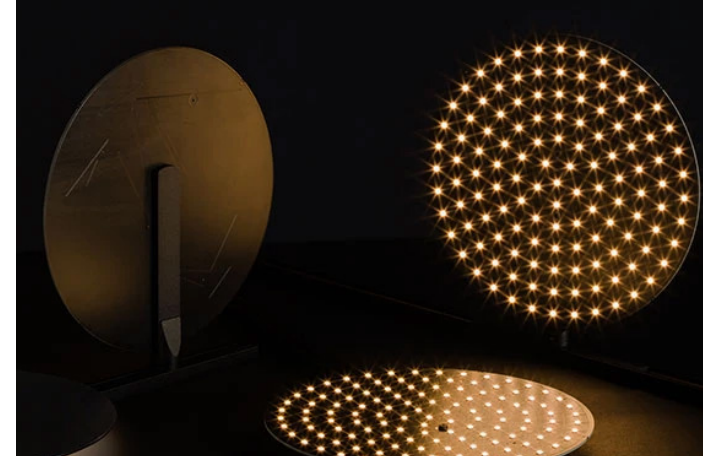

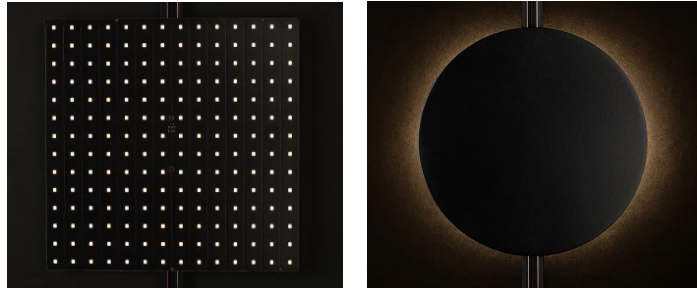

# Products

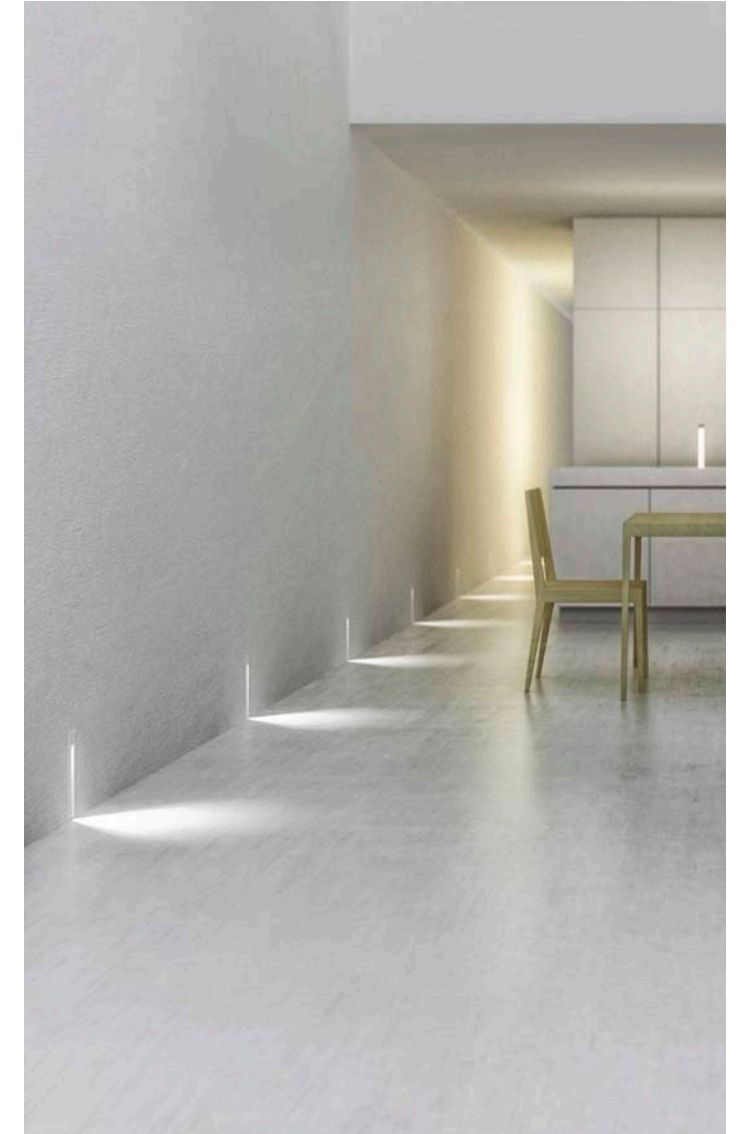

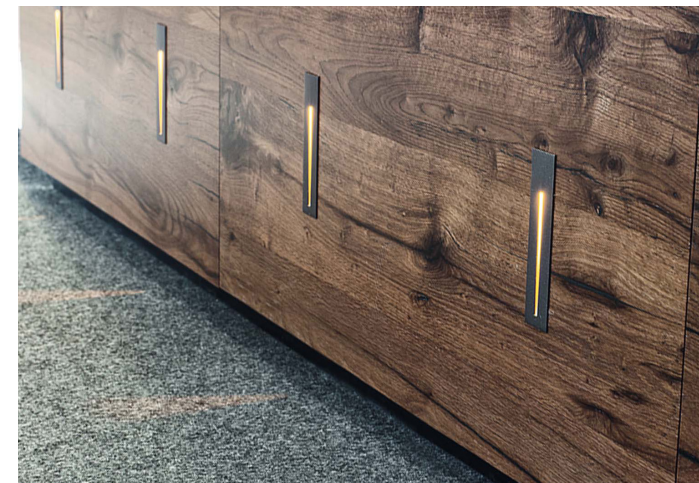

# Code System

It can set the mood in any space from cozy and warm to cool and contemporary or simply serve as a bold design feature.

At full output it delivers pure, powerful light; dimmed, it becomes a floating graphic glow.

# Delight

Features geometric and linear forms in horizontal or vertical orientations, including floor-level options for optimized light distribution.

Recessed collection for refined wall-washing and safe wayfinding, ideal for stairs, corridors, pathways, and subtle architectural accents.

# Dice

A compact ceiling and wall cube, creating clean, expressive patterns across the wall.

Its discreet form hides the light source from every angle while optional adjustable optics allow subtle control of the effect.

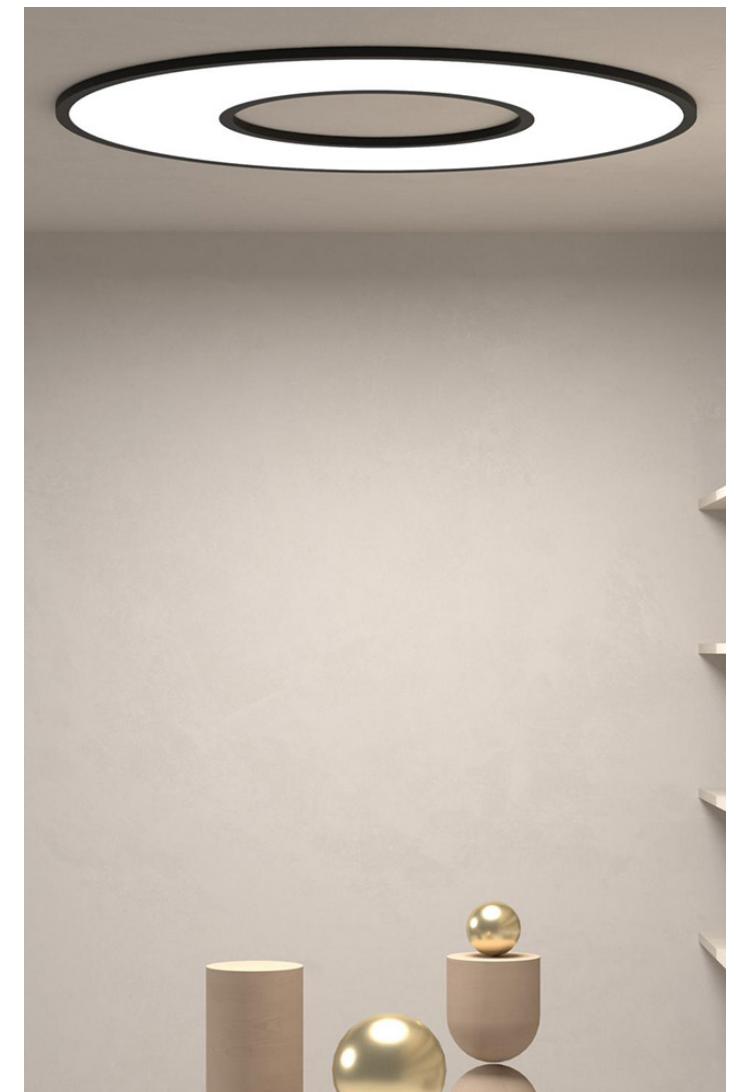

# Harmony Ring

Slender circular forms with soft, seamless illumination.

Solid or open-center options in multiple diameters and finishes.

Modern architectural presence without the need for recessed installation with remote control gear for flexible placement and easy access.

# Just Black Halo

A whisper-slim wall fixture, designed to draw light with refined simplicity.

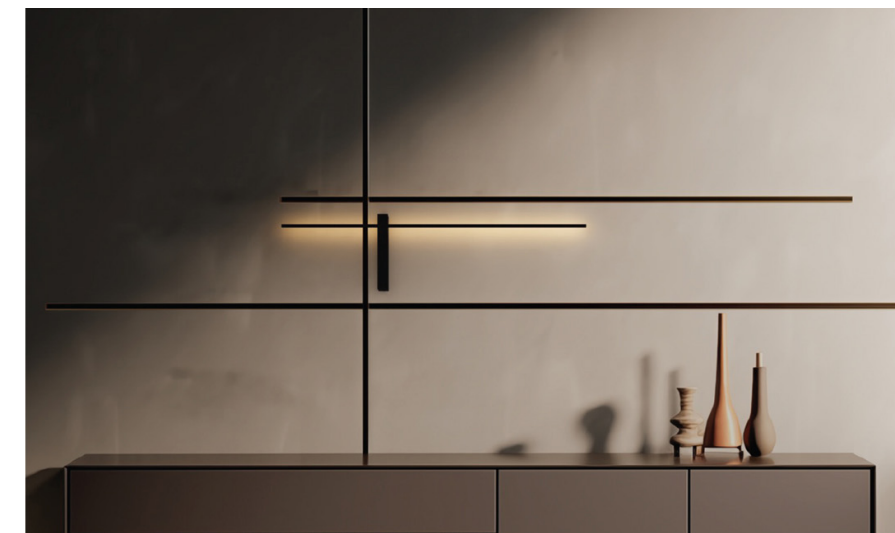

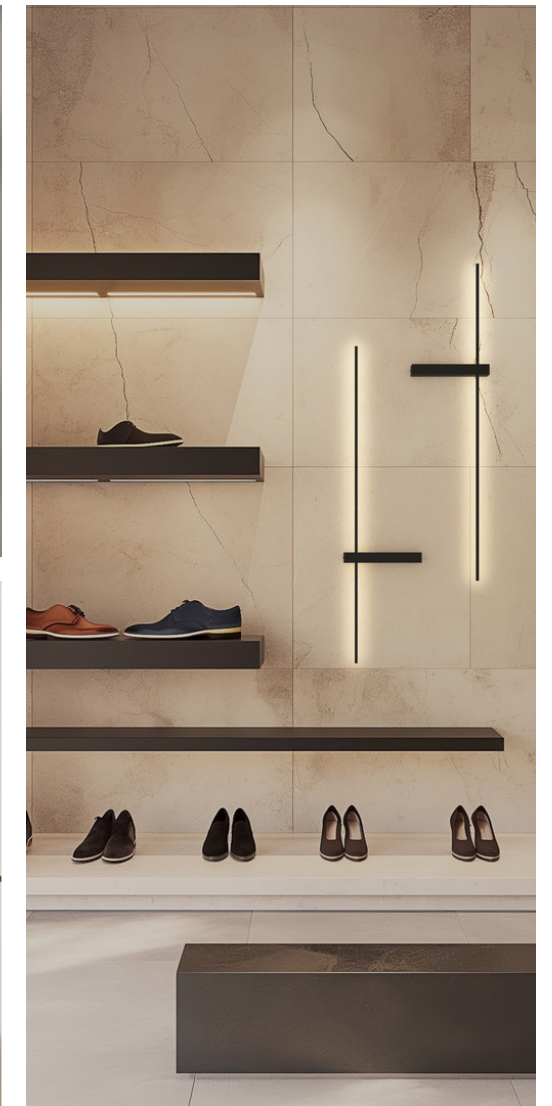

Offered in three refined variations, including a version that pivots and rotates to paint light exactly where it's needed.

Ultra-slim circular rings that create a distinct glow with either direct or indirect light.

The range consists of a wall luminaire and an insert for the Just Black Track.

# Just Black Line

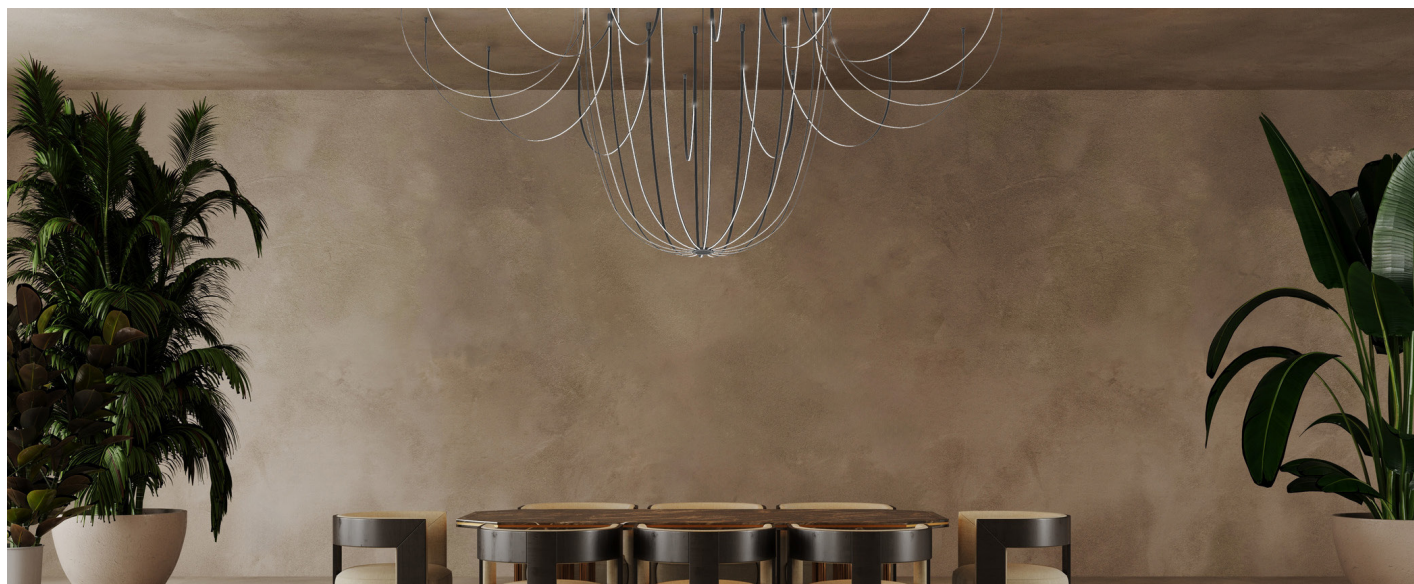

# Loop

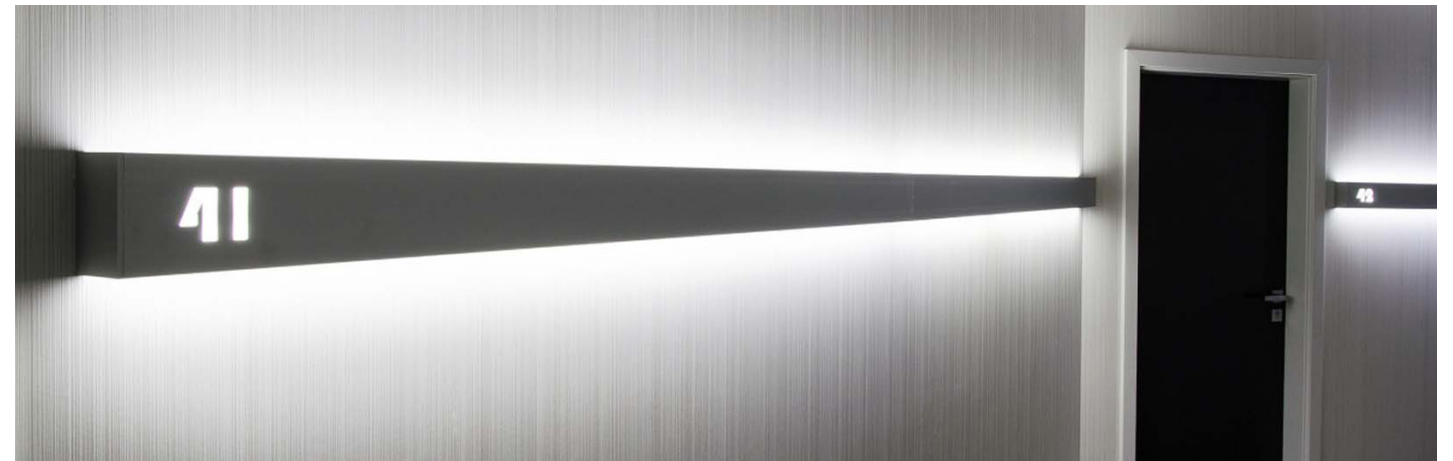

It reimagines the chandelier with sleek simplicity and luminous versatility.

Available in three distinctive shapes.

Loop uses visible LEDs on sleek circuit boards to form thin strips, delicate chains, and continuous columns of light.

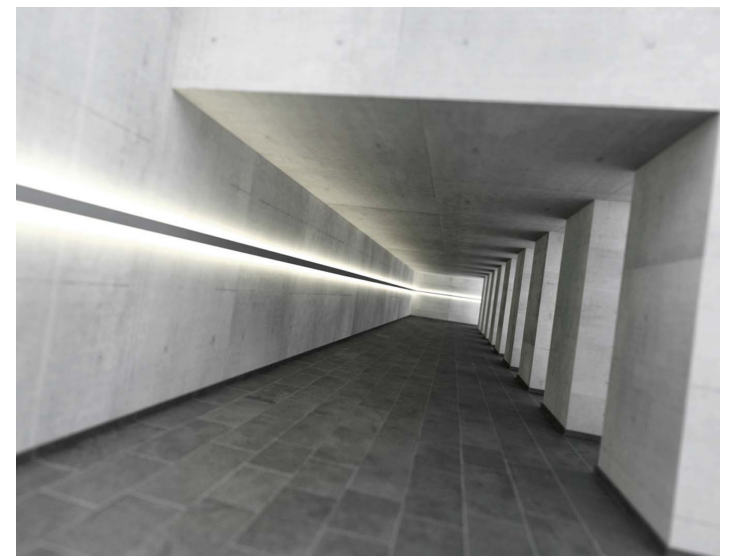

# Never Ending

Engineered with precision lap joints to create continuous runs of light with no visible seams or light leakage, and can be extended almost without limits.

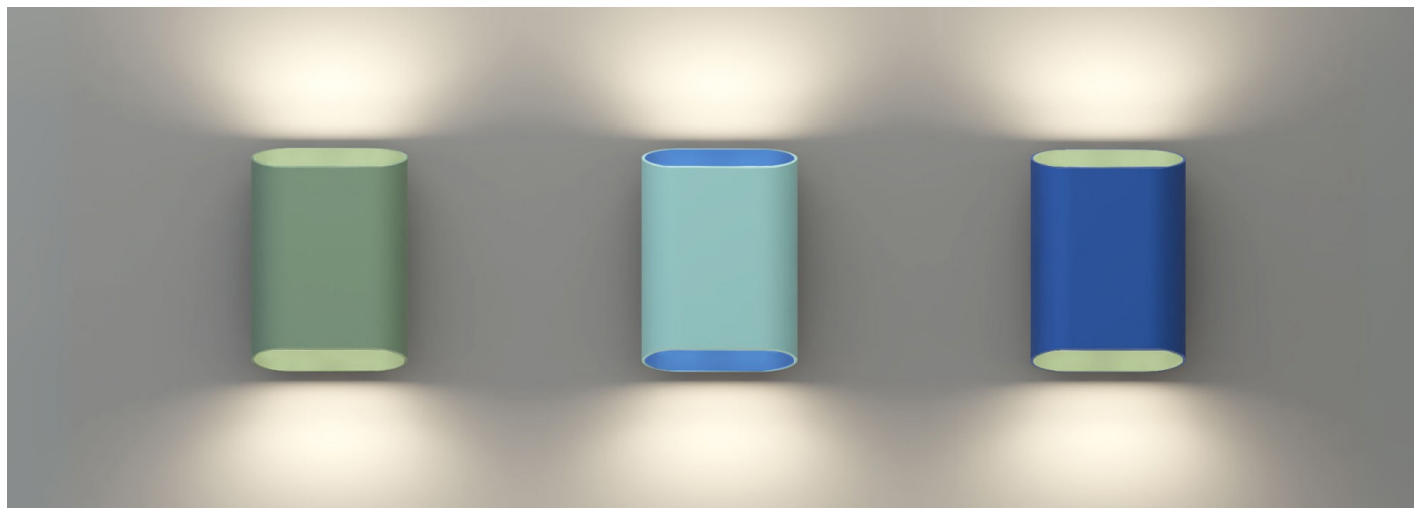

A minimalist glowing line that defines the room's geometry while staying unobtrusive, ideal for spaces where ceiling installations aren't possible.

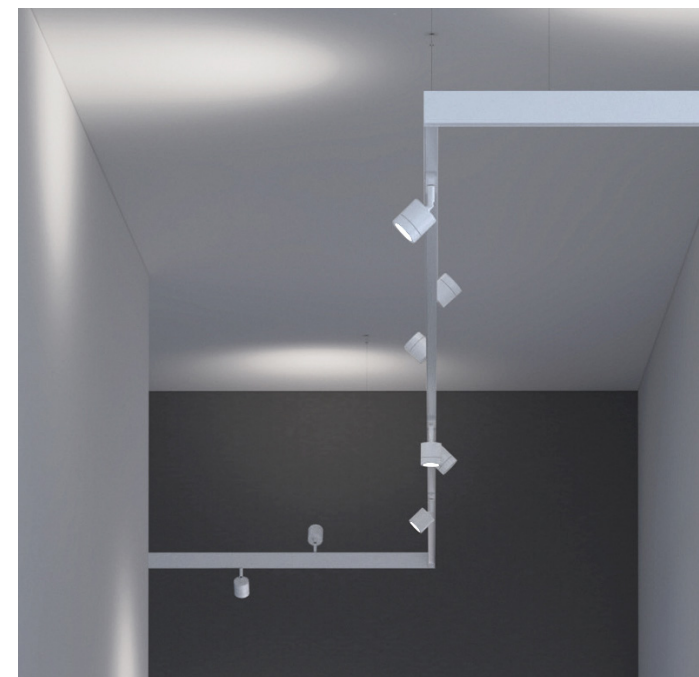

# Ovalis

Projects a unique glow, sending light upward to wash the ceiling, across the wall, and downward to the floor.

Its sculpted oval form creates a layered, atmospheric effect that feels both modern and distinct. Available in multiple finishes.

# Viavai and Viavai - ADA

Viavai combines an ultra-slim, low-voltage linear track with the freedom to place and power light sources anywhere along the track, enabling highly flexible, project-driven lighting compositions.

Viavai - ADA focuses on precision and true continuity, delivering a seamless, uninterrupted wall-mounted line of light through a slim, ADA-compliant profile.

## Expert Collaboration

Working with Zaneen extends beyond choosing advanced lighting solutions. It is a partnership built on commitment to your project's success. Our team provides expert insight, tailored support, and reliable execution to bring your lighting vision to life with precision and confidence.

Throughout the design process, lighting intent is explored, tested, and refined as the project evolves. We collaborate with your team to shape light effects that respond to architecture, materials, and atmosphere, from ambient layers to architectural highlights and controlled accent or grazing effects. Every decision is guided by purpose, technical precision, and visual comfort.

# ZANEEN

Internationally recognized North American provider of premium European lighting, offering innovative solutions across four divisions.
