Expert Collaboration 15

Light has the power to shape perception through reflection, diffusion, direction, and shadow. Our collection of luminaires is designed to create distinct visual experiences from soft wall grazing to precise accent lighting. Today's lighting trends focus on transforming spaces through atmosphere, emotion, and creative expression, allowing light to become an essential element that enriches environments with depth, warmth, and character.

Products

Acqua

Modular twist-and-connect system that supports up to ten LED heads, configured for direct or indirect illumination.

Its sculpted light creates soft, dancing reflections across the wall, adding depth and motion to any space. Available in multiple finishes.

Assolo

A family of portable, surface, and suspension luminaires that cast indirect circular light for a refined, modern visual effect. The indirect lamp shadows the wall in a circular design, creating a beautiful and tasteful effect.

High CRI ensures accurate color perception, preserving the integrity of materials and finishes.

Bimba

Made with a polyester cord from recycled ocean-rescued bottles.

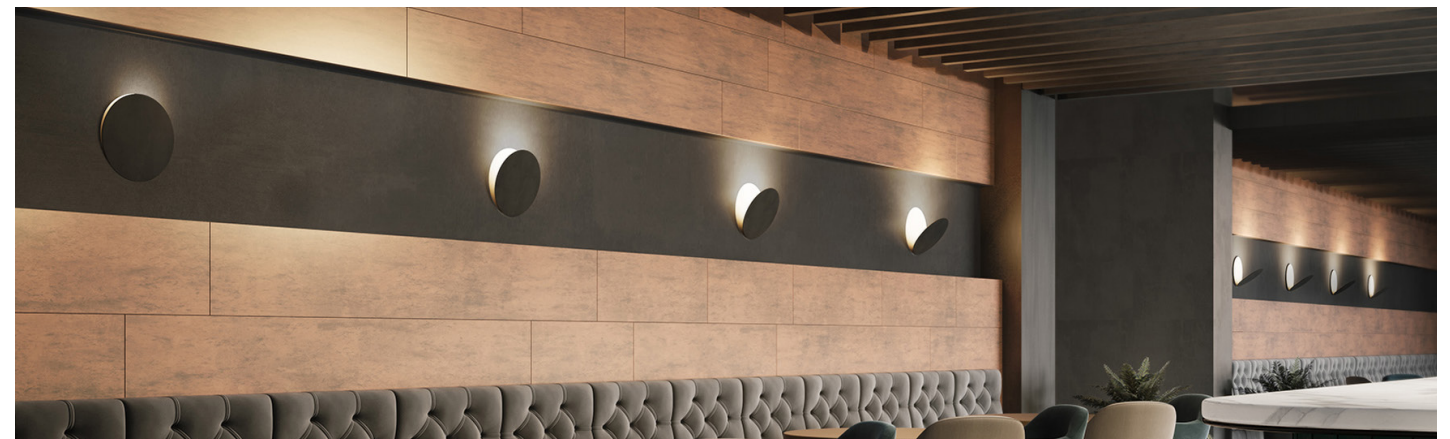

Produces a warm, diffused glow that filters gently through the braided cord, creating a soft halo and textured shadow play on surrounding surfaces.

The layered rope pattern adds depth to the illumination.

Caveau

A moving-panel recessed luminaire that opens like a vault, shaping light in shifting crescents that evoke an eclipse.

Caveau transforms the wall into a living canvas, creating dramatic gradients, soft reveals, and sculptural shadows with every tilt.

Crash

Soft indirect light that bounces off the beaten aluminum surface.

Textured metal creates interesting highlights and shadows.

Color or leafing finishes change how the light looks on the fixture.

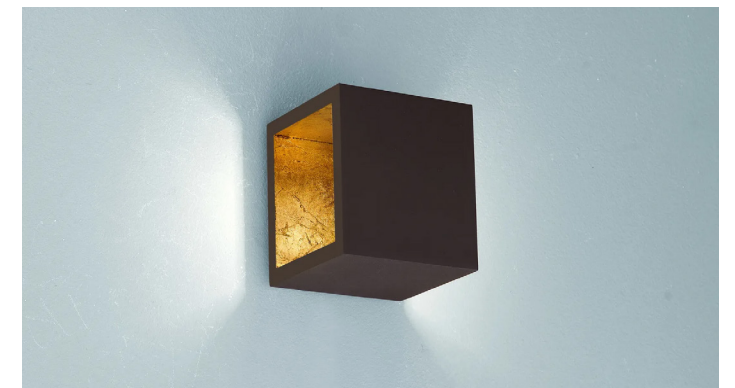

Cubo

Square LED wall light with two side openings, plus an optional version with a third spot-style opening.

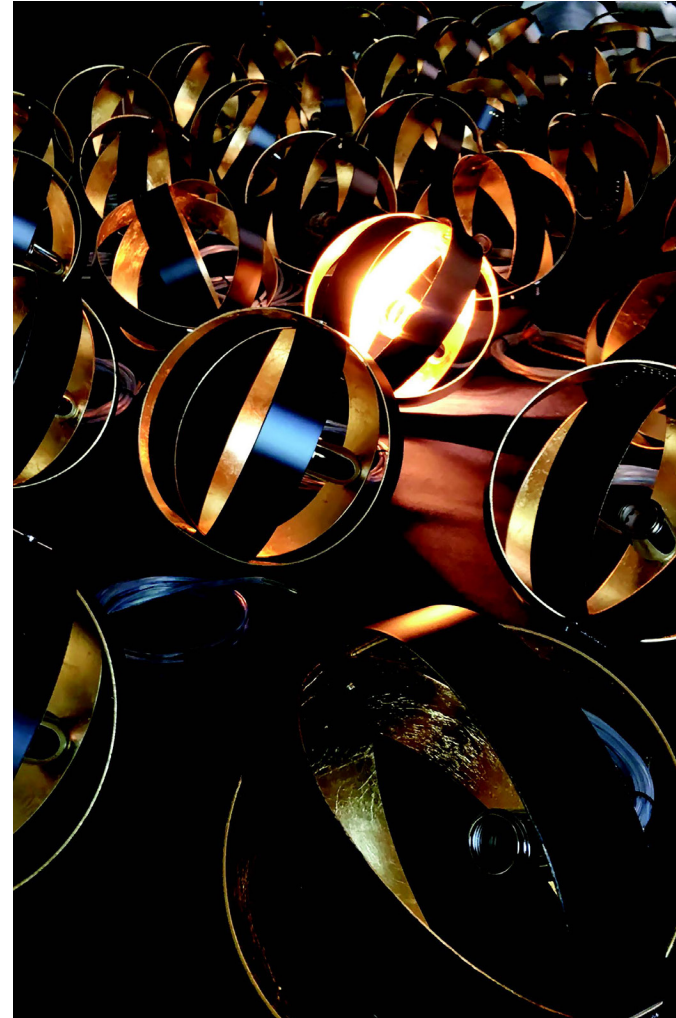

The LED hides completely, revealing only a warm reflection that washes wall or ceiling with soft, elegant light.

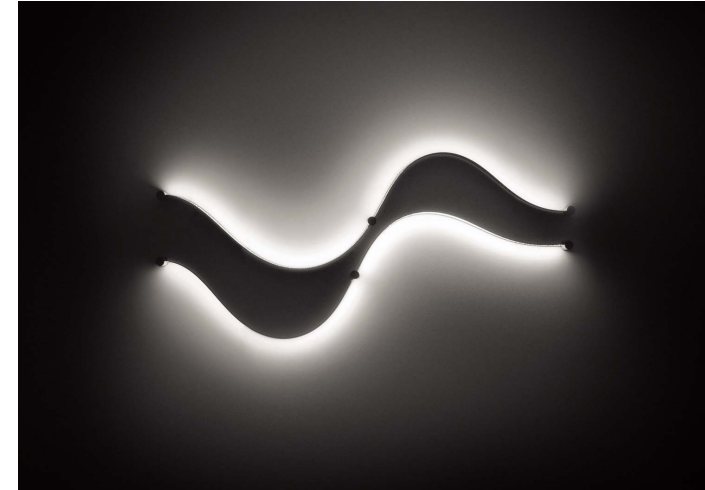

Ecliptika

Unique open-sphere design creates decorative light beams and a sense of movement.

Interwoven aluminum strips with many color-finish combinations.

Formala

A sculptural ribbon of light that bends, curves, and flows across the wall, creating luminous shapes and dynamic shadows.

Its flexible form lets you draw light as art, transforming any space.

Incontro

Two refined metal planes meet to cast soft, indirect light that grazes wall and ceiling.

With the LED fully concealed, it creates quiet, elegant shadows that shift with every installation angle.

Lum

A customizable magnetic system of interchangeable light and non-light panels, installed horizontally.

Combine finishes like copper or leather to build luminous wall designs tailored to each space's aesthetic and lighting needs.

Luz Oculta

Metal version with a center opening adds a soft extra glow, creating a gentle halo effect, and wood version with gaps between panels that cast soft, patterned shadows.

Available as portable, surface, or suspension fixtures for flexible use.

Moonlight

Soft, even glow that spreads gently through the round form, creating a calm and welcoming atmosphere.

Striking visual impact when grouped, as overlapping glows create layered light

NoName

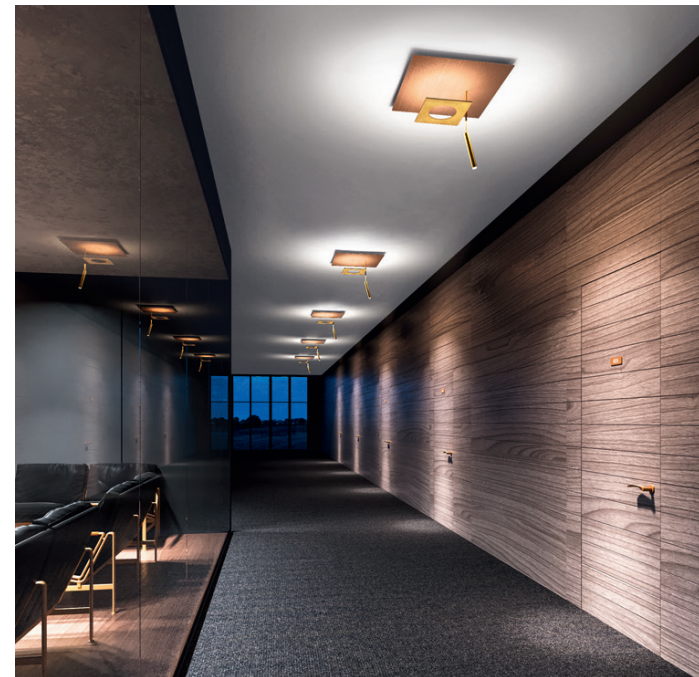

Choose direct, indirect, or a mix of both, depending on the type of light you want, focused, soft, or balanced.

The modular setup lets you build different light effects, from gentle ambient glow to strong, sculptural lighting.

Petra

Indirect light reflects off the metal to create a warm lighting effect.

Square base + adjustable circle shapes soft, controlled light patterns.

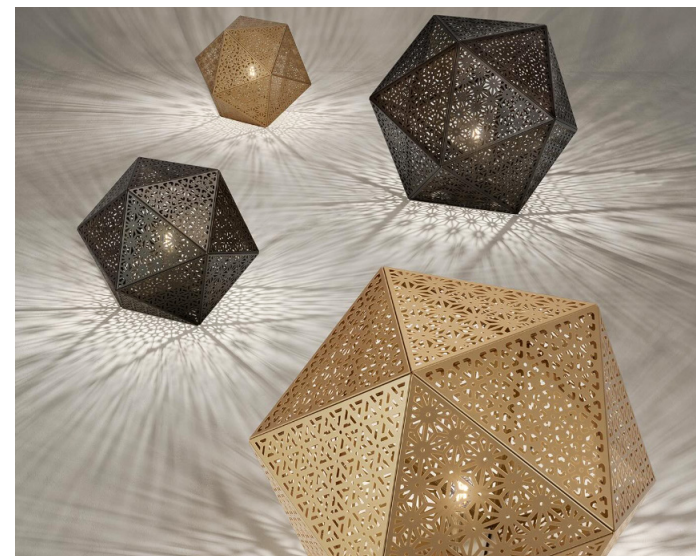

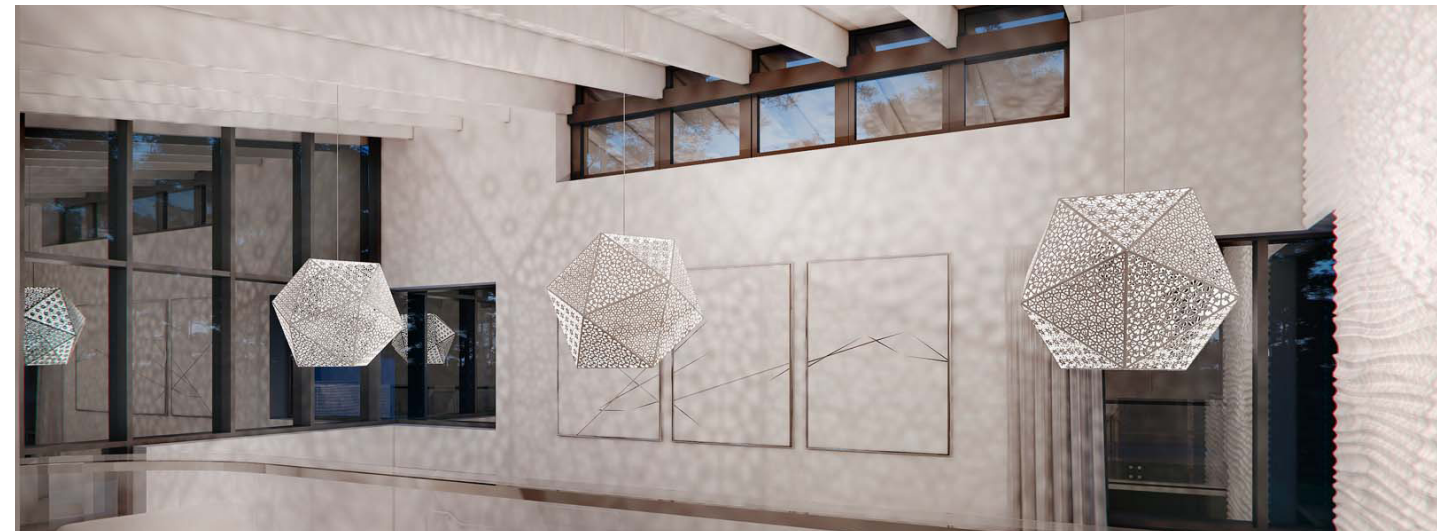

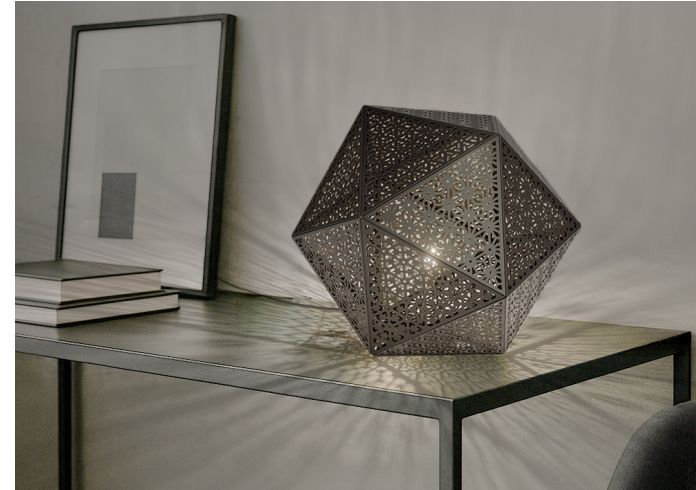

Rotating and tilting layers let you fine-tune glow and shadow on site.

Punto!

Soft, focused glow that adds gentle accent lighting to walls or ceilings.

Small form with strong visual impact, creating a subtle highlight even when off.

Cutout design gives off gentle ambient light and creates eye-catching shadows on surrounding surfaces.

The geometric form produces a playful mix of light and shadow and still looks decorative when turned off.

Salsola

Twisted aluminum form wraps around the light source, creating a distinctive indirect glow that gently diffuses into the surrounding space.

Its curved forms cast soft artistic light, adding a subtle sculptural touch to the space.

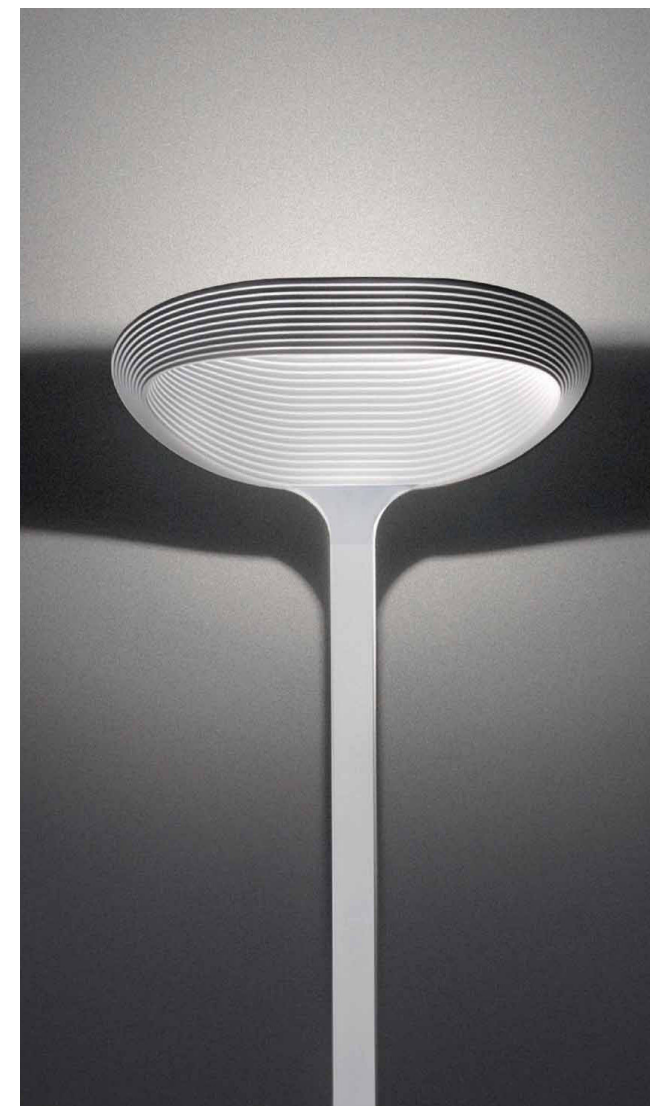

Sestessa

LED light reflects off the concave, rippled dish, creating a distinctive and textured light effect.

The open cave design delivers multi-directional illumination for added depth and interest.

Vera

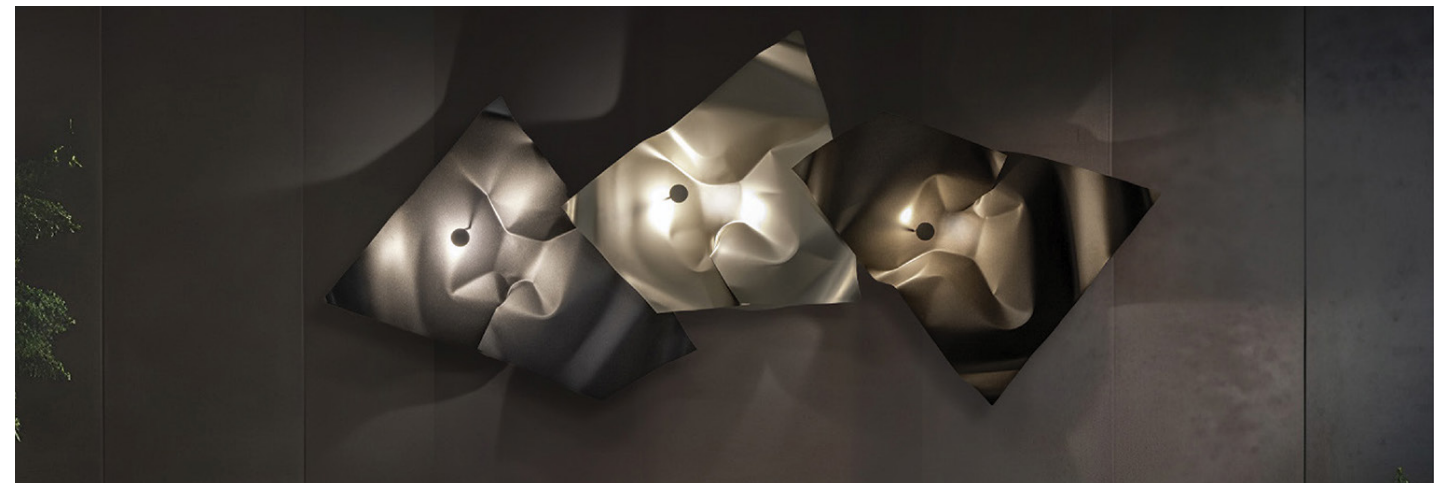

Overlapping ring surfaces create an eclipse-like look and give off a soft, indirect glow.

The adjustable disc rotates 360° and tilts 90°, allowing full control of how the light spreads on the wall.

Zona D'Ombra

The irregular hand-beaten surface of Zona D'Ombra creates a unique play of light and shadow.

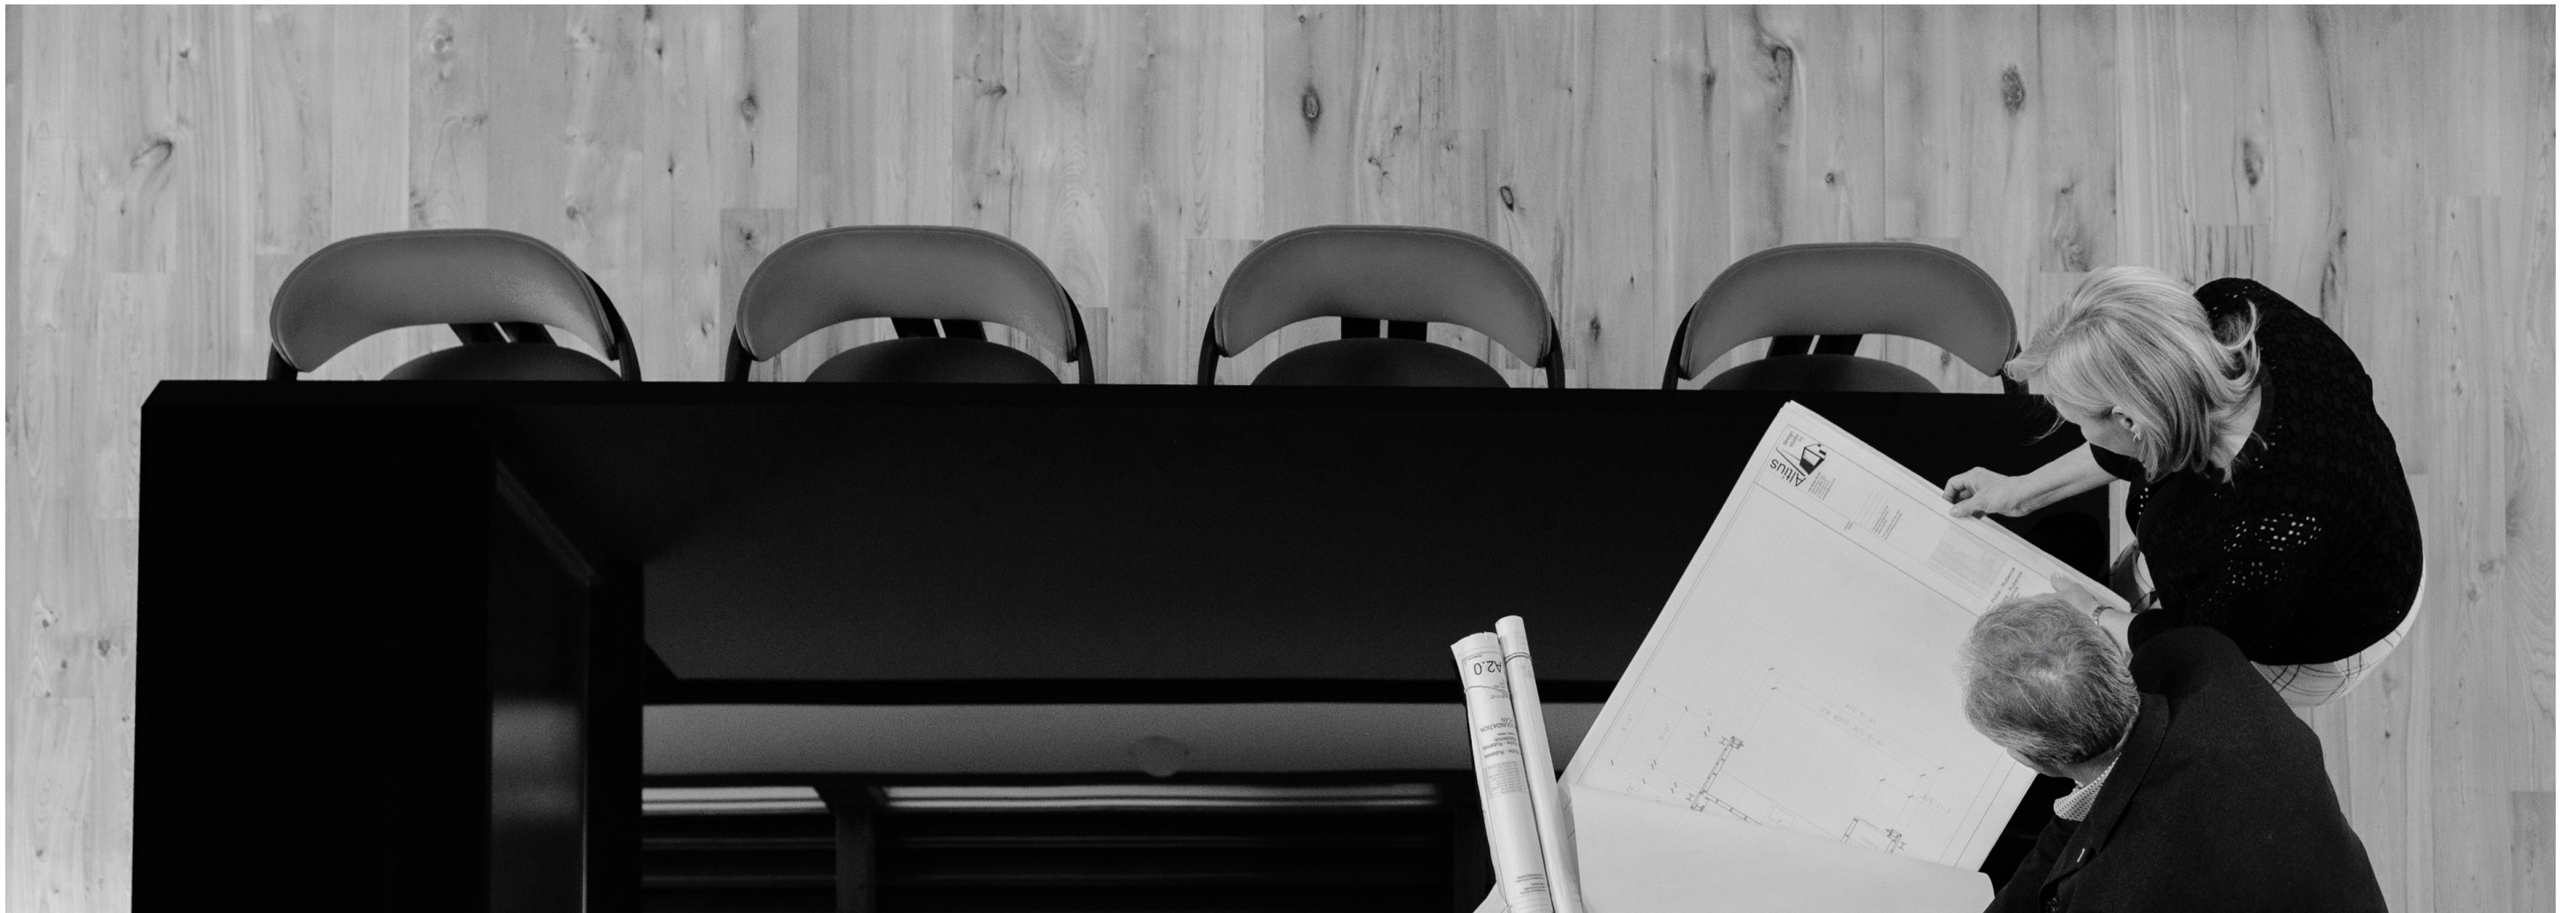

One or two spotlights illuminate the sheet, producing dynamic flashes and depth.

Expert Collaboration

Working with Zaneen extends beyond choosing advanced lighting solutions. It is a partnership built on commitment to your project's success. Our team provides expert insight, tailored support, and reliable execution to bring your lighting vision to life with precision and confidence.

Throughout the design process, lighting intent is explored, tested, and refined as the project evolves. We collaborate with your team to shape light effects that respond to architecture, materials, and atmosphere, from ambient layers to architectural highlights and controlled accent or grazing effects. Every decision is guided by purpose, technical precision, and visual comfort.

ZANEEN

Internationally recognized North American provider of premium European lighting, offering innovative solutions across four divisions.
